

## **KC's SkyVegas CVV Cashout**

***KC's really, really lazy, unambitious... simple skyvegas casino cashout..***

Steps:

- Reg at [SKYVEGAS](#) use a real UK profile that checks out, dob needs to be correct for firstname/lastname/address
- Deposit from CVV, no vbv/msc whatsoever, 100-200GBP in the right zone...
- Get lucky, bet large, do slots or live casino, whatever takes your fancy.
- [SKYVEGAS](#) have this really attractive policy which allows CCVs to be completely removed when your net deposits are reached, so if you deposit 200 once 200 is withdrawn you can remove that ccv from the account completely.
- Winnings can go wherever you want, skrill, paypal, VCC, CC... just add it to the account and withdraw, no further deposit needed...

Ive done this a few times with spare cvvs, once I deposited 200, won 1000 within like 30 mins on a random slot, put his 200 back, deleted the card and withdrew the remaining 800 to another card I had access to... sky is instant with withdrawal processing... had it two days later...

If you loose the 200, dont redeposit as then you gotta go for the combined total, just do a new acc, it really int that hard to get lucky on slots, especially when you can let loose with free money...

Im by no means saying "here! wow! Revolutionary!" but its an easy bit of money for the price of any old UK ccv.. I was just replying to a thread and thought itd be better of as a topic.... also not run this for about 3-4 months but should still be as suggested above!!

you will never need ID to withdraw if your UK profile is accurate, so firstname, lastname, DOB, address - it checks against the UK electrol register electronically, if your profile isnt accurate, sky will let you know after signup, all it will ask for is a UK MRZ passport number that correlates to your profile, piece of piss to generate online, once this is entered your free to withdraw...

Thanks for buying!

cheers

kc
