

OKPAY/CashU Cashout Method

2015

First step : buy fake identity scan (preferably non US) from any good market seller .

- Get a proxy socks 5 from the same country of fake scans ,I use [THIS](#) service Sock5 and purchase socks from there according to your CVV = City / State. (Preferably Non-Us , I will tell you why)

- Get ccleaner software (to clean your flash cookies) . Don't forget to clean your click applications then click also wipe free space 35 x .

- Download technicium mac address changer [HERE](#) (in order to change your mac address .

- Now you installed a proxy socks 5 (local connection) . Your browser is clean = lets get started .- Open cmd and type :

**Ipconfig /release
Ipconfig /renew
Ipconfig /flushdns**

Now you cleared your ip and DNS cache .

- Go to [OKPAY](#) : , create a fake account (upload ID to get verified) , you can easily buy at BMR . Ok then once your fake account is fully verified (Few hours not more , sometimes 24 hrs).

Bobbyhillhank: LTC goes down 2.5% and everyone freaks out lmao
brandish: longshot, its "Reuters"
paydirt: Just develop a payment processor with LTC as the backend, people don't even need to know they are using it...maybe that's cray
libre: what people think about namecoin ?
longbuech: tandit, yes
longshot: brandish: no, that news was the cheap \$h1t
valo94: just bullshit please
drama247365: Cronos, doesn't matter if noone will use it ya nignog
Diablo02: ltc dropping to 0.0142
longbuech: longterm, ppc will replace ltc as second highest marketcap crypto
Bobbyhillhank: good time to buy ltc
atomicchaos: First Satoshi, the BKK, I think the NSA is kidnapping CRYPTO kingpins

Register to BTC-e , (be carefull BTC-E not allow US customers) , that is why I told you a non US proxy , and non US OKPAY FAKE IDENTITY . To register with btc-e you just put your email adress and okpay verified . So now you have your BTC-e bitcoin wallet (unlimited bitcoins deposits , withdrawal = 100 btc per day) + OKPAY verified account (100 000 usd dollars per month transfer withdrawal and deposit)

Second step : you buy your hacked CC . Change your ip address matching cc and go to OKPAY to create FAKE okpay (matching hacked cc address) NO NEED TO VERIFY this second fake account (you can transfer 500 usd \$ per day from unverified okpay to another okpay account). Then :

GO TO [HERE](#)

Register to pc game supply using a fake mobile number (you can order any sim card from BMR market) its for pcgame supply verification purpose . And card them with your CC.Put the first name like it appears on Stolen card , plus last name , any email adress (to receive cashU voucher number) , max voucher is 99 x 100 usd = 9900 usd \$.

Put phone number they will send you an sms to confirm mobile number , then put your credit card infos , and click send = You'll receive instantly your cashu vouchers by email. You can also pay with

Paypal hacked account (but it works better with credit card. (sometimes Paypal block high amounts). Now with your cashU vouchers , go to OKPAY FAKE unverified account , put the vouchers number to credit your account its instant then when your OKPAY B account is credited transfer to OKPAY verified account . Once you have you're your balance transfer your USD to BTC-E buy Bitcoins and withdraw straight away . You can do it unlimited times . (Start adding slowly , not more than 3000-5000 usd per day).

**DONE . 100 % WORKING ALREADY TESTED .
But always make small transactions on BTC-e , remember**

**you can't withdraw more than 100 BTC per day (at BTC-E).
Enjoyyyy. You can also Use the same method with liqqpay to load BTC-
E and buy bitcoins .**

Hope you enjoyed the tutorial .
