Payments can be done only through paypal.

After you sign up go to questions (get paid) and look for everything which can be done by searching on google / wikipedia – such as (english essay , history , sociology psychology , and so on) .

Usually people are not satisfied when the work which you submitted is not original . Here is where (<http://www.freearticlespinner.com/>) comes in. On this site you make a free account and then enter a paragraph. What the site does is to paraphrase your text. Let's say someone asked for an original paper on alzheimer.

On the internet i found this paragraph : Alzheimer's Disease is a progressive and irreversible brain disease that destroys mental and physical functioning in human beings, and invariably leads to death. It is the fourth leading cause of adult death in the United States. Alzheimer's creates emotional and financial catastrophe for many American families every year. Fortunately, a large amount of progress is being made to combat Alzheimer's disease every year.

The translation the site provides me: Alzheimer's disease situation Disease is a modern and permanent brain situation that ruins mental and physical performing in human beings, and invariably leads to dying. It is the fourth leading cause of adult dying in the United States. Alzheimer's disease situation creates emotional and financial problem for many American families every period. Luckily, a lot of progress is being made to combat Alzheimer's disease situation every period.

The translated text has very few mistakes and can be correct very fast.this way you can paraphrase the work you are about to submit.most people will check the file after they buy it from you with an online plagiarism checker. This will come clean.

This will be your main account.

2. Step two : Multi-accounts

What you can do next is to make several other accounts.they do not have to contain a real mail or anything. What you do on this account is make money which will be transferred to the main account.

How do you do this? You take every question and try to :

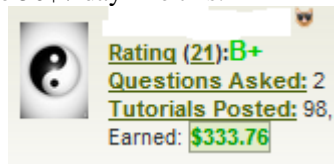

1. Reply to it just by copy-pating the question in the “ your tutorial “ section.
2. Download their file and slightly modify its name .
Example : their file name is math205 . The name of the file you will submit will be math205 solved or solutionsfor+name of the person .
3. Search something on wikipedia that has something to do with it and add it in the “ your tutorial “ section , or in the document they uploaded.

The site will offer them only a small preview which will coincide with the work they uploaded or asked for.

Some of the tutorials will be bought by people who will not be satisfied . They will ask for a refund and also rate you with f. Trying to get the money out of this account by withdrawing is a mistake because the staff will clock the account.

Next you will make a question from this account (secondary account).be sure you can give a good respose to it. Or make sure you can find a good tutorial on the internet for it.at the bounty put a small price (1\$). Then leave it there for 2-3 hours. After this you will reply at this question from your main account. Try to also simulate some messages between the two accounts to raise credibility. Then you buy the tutorial and rate yourself with a or just leave it like that.

You can have as many accounts as you want. Try not to make too many transfers at a time.keep a low profile. You can make up to 50\$ / day like this.

Next thing you do is withdraw from you main account.

Thank you for purchasing this tutorial. Now go make some money!!!!
