

Sure Way To Get 10,000, 25,000, Or Higher Creditcards Even If Your Credit Sucks!

Materials Needed:

1. USA Fullz (One good person preferably born before 1945) 1A: SS Number, DOB, Address, and in some cases Licence
1B: Background report (not required but makes things easy)
2. Computer running latest software
3. A List of cards you would like to apply for

With these simple things I can show you how to get all the money you need...

Easiest target cards:

Capital One, Citicards (Thank you card), Target, Walmart, Best Buy

Step One:

Go to the websites for the credit card of your choice and go to Apply for credit....

Use the information on the fullz for the application.

If you get a person born before 1945 changes are they will not have computer skills, access or knowledge of using a computer and they will most likely have very little if any credit cards and in most cases have almost perfect credit... Run through the steps...

Very Important:

Side Note: When you get to address.. write one you have access to but put lived at less then 6 months... Most sites will ask for previous address and once you enter all security checks will let the application through

For work, always put employed, making more then 70,000 and an additional 12500 in other income..

Enter that they have both savings, and checking, or if more choices check them all.. and say that the total number on all accounts is between 50,000-199,000

You may select yourself as an authorized user on the account

Finish application:

In 60 seconds or less you should have your first working card.. Usually between 5,000 - 10,000 in credit limit...

Money available right away

Target gives you access to the card right away, set up an online account at Target.com and buy Gift Certificates.. Redeem immediately online or at Target through your smartphone..

10,000 Capital One Card recently received on my part..

They dont give the full credit limit right away but 200 is good to buy gift certificates
