

CC to BTC Methods

Always use RDP, SOCKS or VIP72 client or Proxifier on RDP.

On Windows:

Delete your DNS Cache by typing on CMD : `ipconfig /flushdns`

Release your cache by typing on CMD : `ipconfig /release`

Renew your IPV4 or cache by typing on CMD : `ipconfig /renew`

Method #1:

Step 1: First go to <http://payeer.com> and register there. Put only mail address and captcha. Use hotmail or gmail for better result. Then a window will tell you your User ID, Password and Master Key, save them on a text file. Do not lose this info!

Step 2: Next step is to confirm your mobile number; you can use your own mobile number or any text-receiving number.

Step 3: Now comes the main part.

Scroll to the top. On the menu click "Add".

Then choose your preferable payment method, "Visa/Mastercard" (note: use USA socks for see that payment option available). Otherwise can use EU bank logins using preferable socks to topup Payeer wallet. And make sure your wallet is SMS Verified.

Step 4: Now enter your card info's or bank login (if you select Intl. Wire Transfer or Bank transfer). Be careful Payeer is **VBV/masterpass protected site**, try to make use of Non-VBV or best BIN.

Step 5: After successfully purchasing Payeer balance, you can go to "Exchange" to get on your preferable ecurrency wallet, and send them to your personal e-wallet. To exchange to BTC, first exchange from Payeer to PerfectMoney, then use an external PM to BTC exchanger site like the ones listed below.

<https://p2pchange.is/>

<http://pm2btc.me/>

Method #2:

Note: Be sure to use good private socks/RDP because this site is very secure.

Step 1: First go to <https://superbit.hk>

It's basically a site that sells digital copies of romantic relationship handbooks.

And they give free bitcoins matching the price of the ebook.

For example, you buy 2 soft copy and each is 10\$ so $10 \times 2 = \$20$ they will send you 20\$ to you in Bitcoins.

Step 2: Click on buy now and then choose any item you want to buy, and choose the quantity

Step 3: Enter your email enter cc owner name and quantity etc and click submit.

Step 4: They will send you confirmation email open the link in email confirm account and then complete payment by cc.

Step 5: They will send you the ebook by email and the link to submit your BTC wallet information. Fill in the appropriate information
