Method

We have a list of emails (will be explained latter how to get it) and we filter those people registered at Amazon. If we know that most affiliate sites offer 30 days cookie, we can take advantage of that and email our targets. But we need to make sure they click on link in email.

Example, we send to them newsletter like they are getting it from Amazon. We send email like **"Your payment is declined"** or **"Order is not shipped"** **"Order Confirmation Receipt"** or something like that . We mask our affiliate link with **"Order Confirmation Receipt"** button so they will click on our **Aliexpress** affiliate link.

After they click on Affiliate link we have "30 day cookie" so if they buy something in those 30 days we will receive commission.

But to make money as much as we can, we need to work with people who buy items daily. Who buys items daily? People doing dropshipping or people who have Shopify stores buy items daily.

So we need to apply for affiliate at Aliexpress because most of people dropship products from Aliexpress(I know that because I was doing with dropshipping in the past). After we apply at Aliexpress affiliate and we got approved we need to find people and send them email.

This is a list of Shopify stores. We just need to search them and to scrape emails from those stores.

We send emails like we are those clients and we have problem with product or we didn't receive it.

Like:

Hey wtf my product is broken [examplelink.com/img.png](#)(Here is our affiliate link) I want refund or send me another item.

You can use url shortener providers but I suggest to buy domain like [imgur.com](#) or [printscr](#) and upload picture on them like [imgur.com/picture.png](#) and redirecting them to our affiliate link.

So when they see this [imgur.com/picture.png](#) they will think are clicking on image but you will redirect them to Aliexpress with your affiliate link.

After that , when they buy something you will receive commission. People which run shopify/dropshipping stores buy very much. You can use this method to message them on Social Media's too or anywhere else.
