1. Introduction

This eBook will show you a way to get free Amazon Gift Cards. I suggest you to familiarize with content before starting to apply the method; read it at least twice and contact me for every question you may have.

The step zero is setting up your workplace by downloading additional browsers that will be used exclusively for this. It allows to manage multiple instances in parallel and quickly clean everything.

I have picked Opera, Waterfox and Chromium as additional browsers:

<https://www.opera.com/>

<https://www.waterfox.net/>

<https://www.chromium.org/>

2. Account Creation

The following steps have to be applied in every browser.

Let's proceed by creating a fresh email account. You can use your favorite email provider for this. Let me recommend some that *currently* do not ask for mobile verification to validate new accounts.

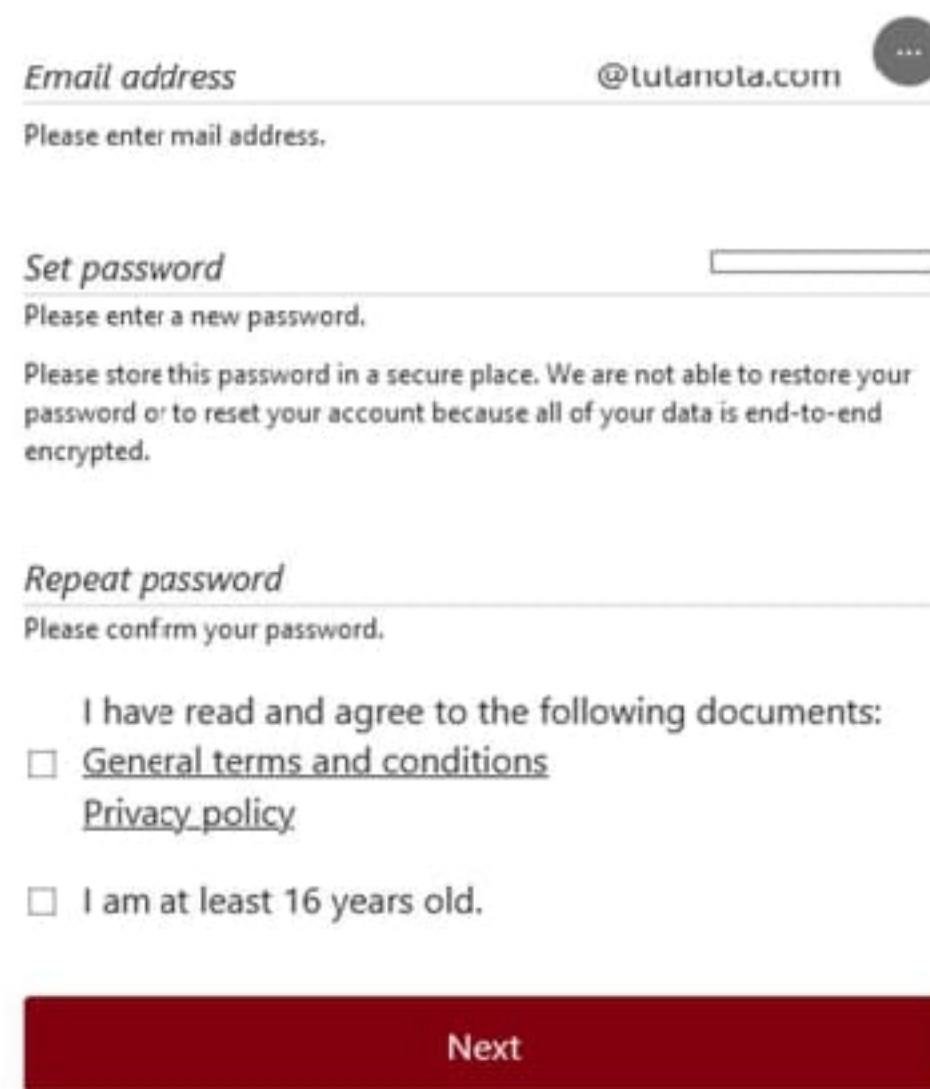

In general, you can refer to Yandex, they will ask you to set a security question if you claim you don't have a phone.

<https://passport.yandex.com/registration/>

The screenshot displays the Yandex registration interface. On the left, the Yandex logo is shown above the tagline 'Everything under one account'. Below this, five icons represent different services: a red location pin (Maps), a red 'Y' (Yandex), a red 'A' (A), a yellow envelope (Email), and a blue 'O' (Opera). A paragraph of text states: 'With a single account, you can search, write emails, save and share your files, find stuff you want, get directions and use other services on all your devices and platforms'. At the bottom left, there is a 'Support' link and a copyright notice '© 2021, Yandex'. On the right, a 'Registration' form is visible. It contains input fields for 'First name', 'Last name', 'Enter a login', 'Enter a password' (with a toggle for visibility), 'Confirm password', and 'Mobile phone number'. Below the 'Mobile phone number' field is a link that says 'I don't have a mobile phone'. A red arrow originates from this link and points towards the left side of the page.

Else you can go for TutaNota:

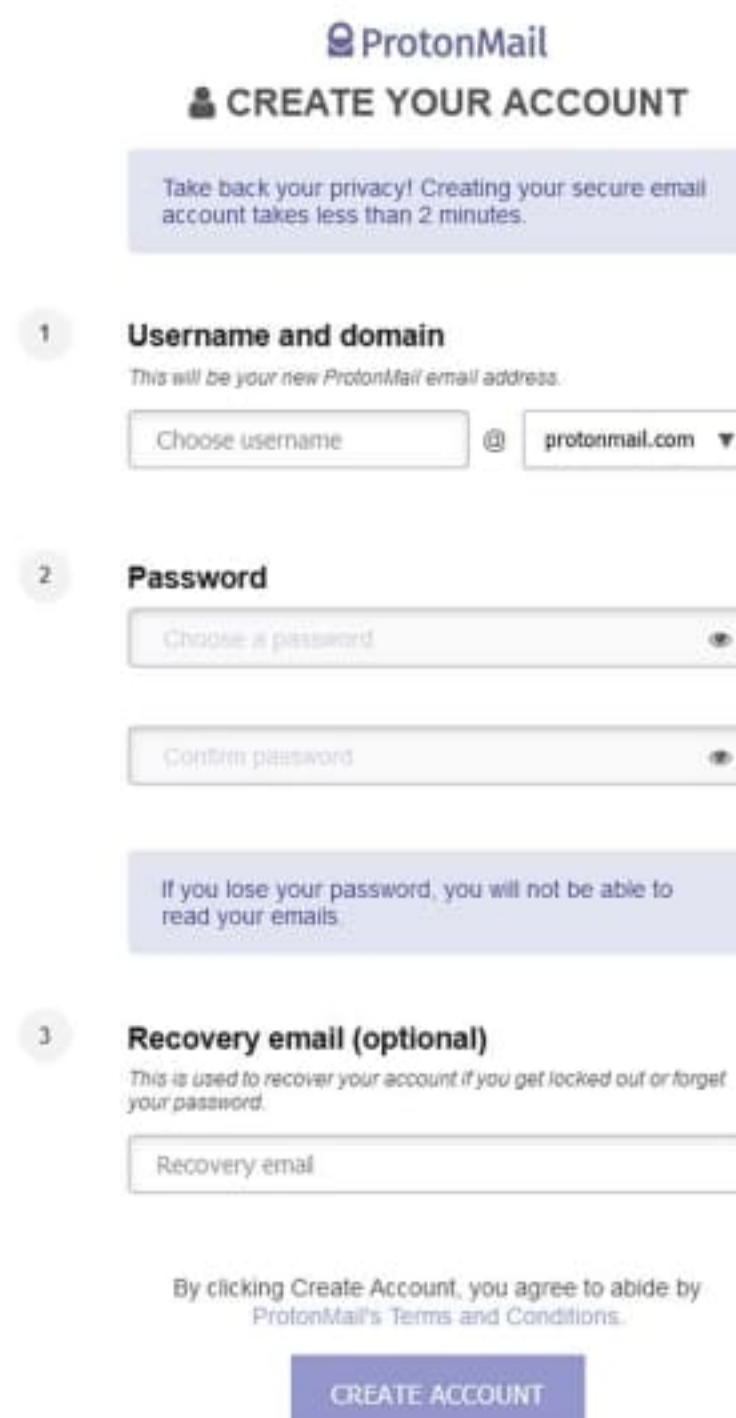

<https://mail.tutanota.com/signup>

The screenshot shows the Tutanota registration page. It has three main sections: 'Email address' with a text input field and a dropdown menu currently showing '@tutanota.com'; 'Set password' with a text input field and a warning message: 'Please store this password in a secure place. We are not able to restore your password or to reset your account because all of your data is end-to-end encrypted.'; and 'Repeat password' with another text input field. Below these are two checkboxes: 'I have read and agree to the following documents:' followed by links for 'General terms and conditions' and 'Privacy policy', and 'I am at least 16 years old.' A red 'Next' button is at the bottom.

Or finally, ProtonMail:

<https://mail.protonmail.com/create/new?language=en>

The screenshot shows the ProtonMail 'CREATE YOUR ACCOUNT' page. It features a three-step process: 1. 'Username and domain' with a text input for 'Choose username' and a dropdown for 'protonmail.com'; 2. 'Password' with two text inputs for 'Choose a password' and 'Confirm password', each with an eye icon for toggling visibility; 3. 'Recovery email (optional)' with a text input for 'Recovery email'. A warning box states: 'If you lose your password, you will not be able to read your emails.' At the bottom, a disclaimer reads: 'By clicking Create Account, you agree to abide by ProtonMail's Terms and Conditions.' followed by a blue 'CREATE ACCOUNT' button.

The email address you just created must be used to register a Facebook account. Once you've made it, upload a profile picture and make it mobile-verified. I will cover how to perform mobile verification right now.

3. Mobile Verification

In this chapter I will show you how to perform mobile verifications. These will be required each time you create a new account.

Join GetSMSCode: <http://www.getsmscode.com/?ref=117400>

Visit the Topup page to add funds via:

- Credit Card (Stripe)
- Crypto Currencies (CoinPayments or BitPay)
- WebMoney
- Alipay
- Perfect Money
- Payeer
- AdvCash
- PayPal (they will ask you to trade your PayPal for crypto)

3

The diagram shows a red arrow starting from the 'Get Phone Number' button (labeled 2) and pointing to the 'Get Chinese Phone Number' button (labeled 1). Another red arrow starts from the 'Get Chinese Phone Number' button (labeled 1) and points to the 'Get USA Number' button (labeled 3).

I recommend starting with “Chinese Mobile” numbers since they’re cheapest.

Here you have to pick “Facebook” from the project selector, then hit the “Capture Phone Number” button. You will generate a mobile number valid for 5 minutes.

Get Verify SMS (Chinese Number)

Tips: You can insert mobile number above like +8613526632212, if the number still online, you can

3. Put The number into website/app to Get verification SMS
(Notice this phone number will invalid in 360 seconds)
If timeout, please capture a new phone number

4. Click button to Get SMS

[Get SMS] ☒ Auto Get ☐ Sound notice

1: 410403 is your Facebook confirmation code[PIN]

It has to be copied and pasted inside Facebook verification page:

The screenshot shows the Facebook Mobile Settings page. A dialog box titled "Enter Your Confirmation Code" is overlaid on the page, prompting the user to enter a confirmation code received via SMS.

Facebook Mobile Settings:

- Activating allows Facebook Mobile to send text messages to your phone. You can receive notifications for friend requests, messages, Wall posts, and status updates from your friends.
- You can also receive notifications for your own posts and videos.
- Learn more

Enter Your Confirmation Code Dialog:

You should receive a text at +86 182 0045 2503 with your confirmation code soon.

410403

[Resend Code](#) (please wait at least 5 minutes before requesting another code)

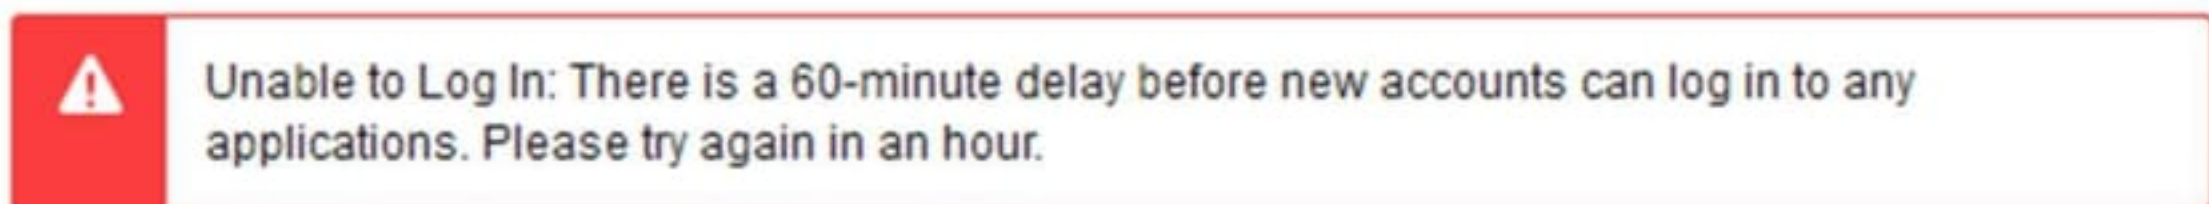

[Confirm] [Cancel]

You're done! Now you own a verified Facebook profile to be used in the following step.

If you don't receive any code or Facebook rejects the Chinese number, you should repeat the process up to another 2 times. If the number keeps being rejected then you should use one from "Other Numbers". They're a bit more expensive (we're always talking about cents per number) but will do the job.

In the worst case, you will always use an US Virtual Number, but it's \$0.50 each.

As soon as you got Facebook mobile verified, proceed at Listia and signup with Facebook. Note that Facebook may require your account to be 60+ minutes old before being used to signup for external applications.

Listia is a website where you can use auctions to buy and sell goods, using an internal virtual value.

<https://www.listia.com/signup>

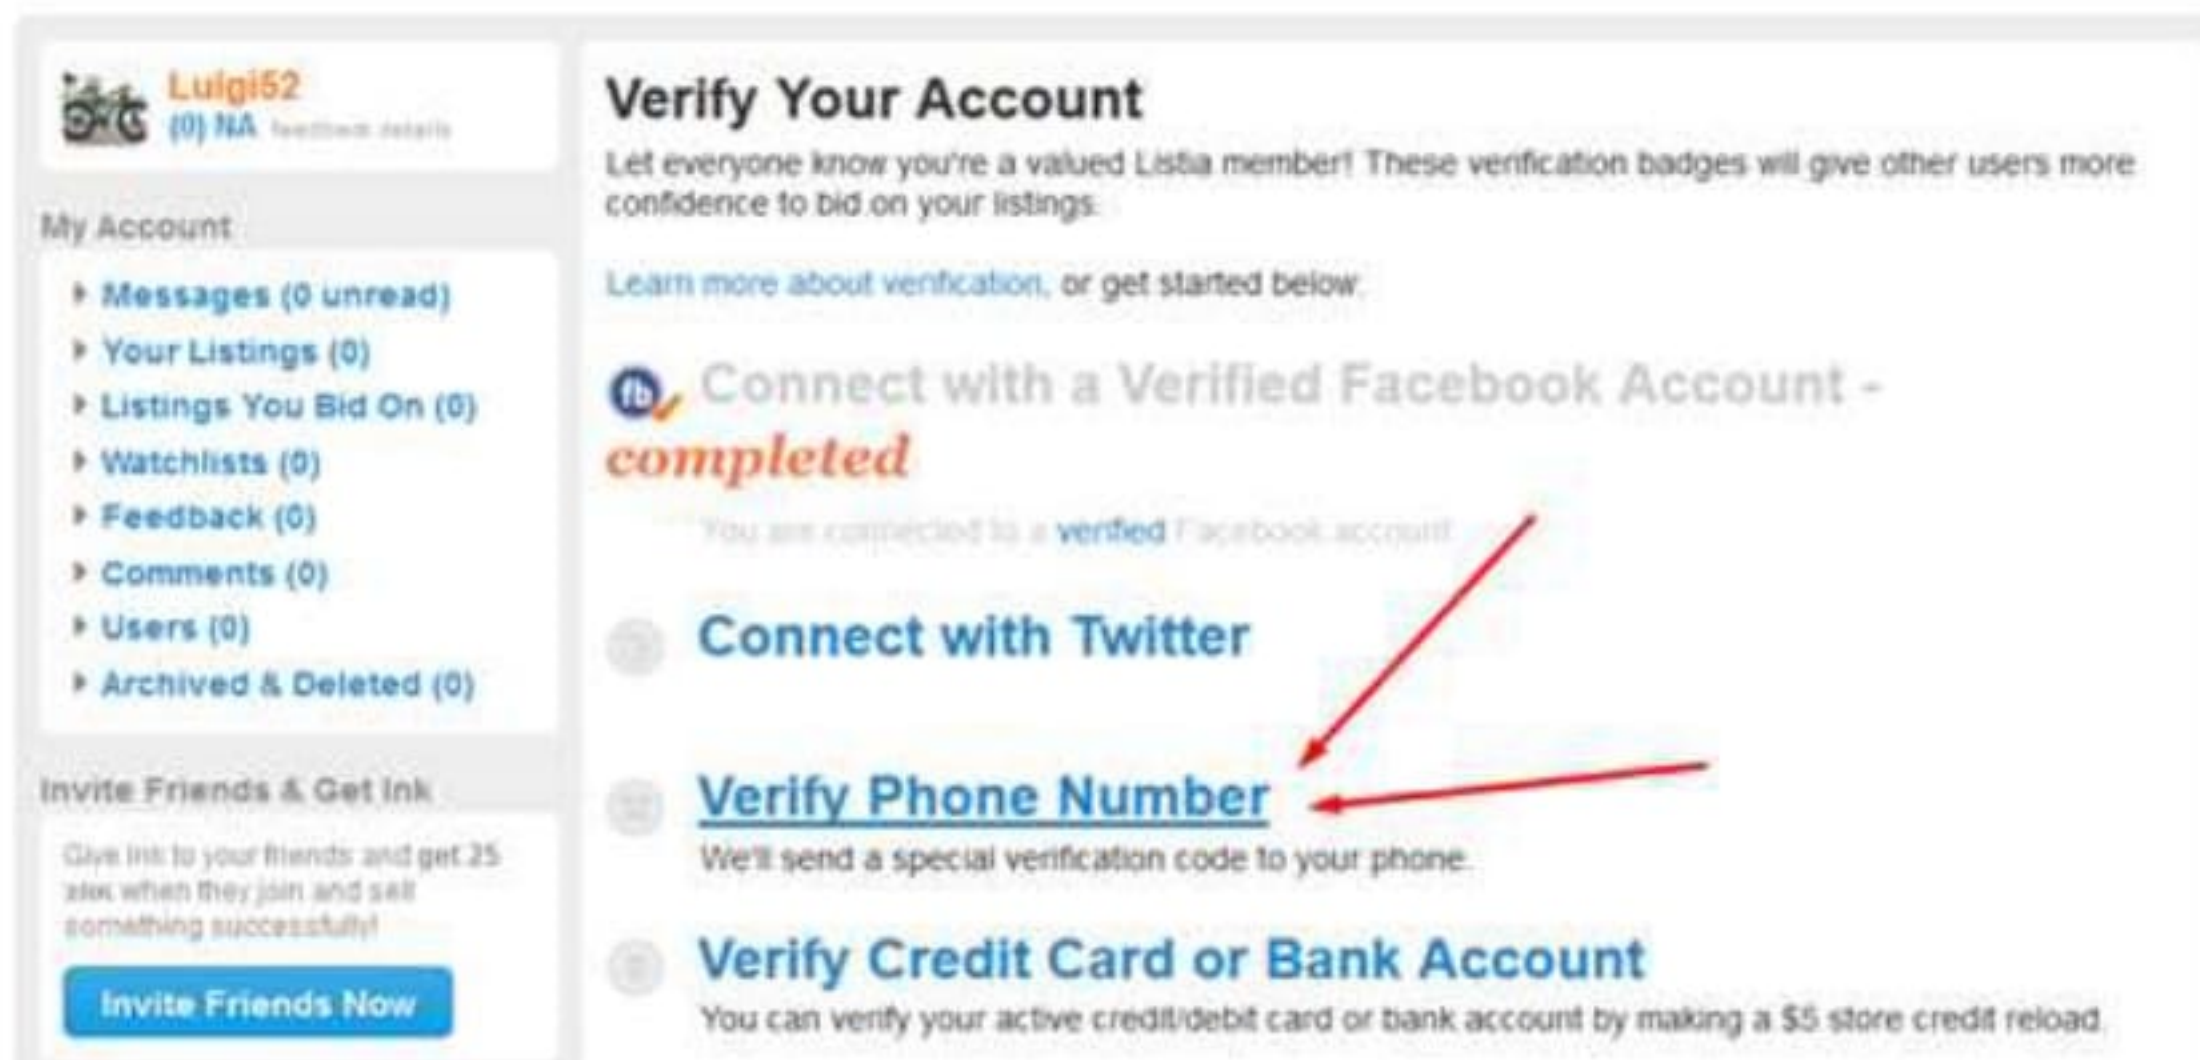

Listia will receive:
your public profile, friends list and email address. ⓘ

 [Edit This](#)

Continue as Luigi

Done. You just created a Listia account. Ignore the welcome page, we have to verify this account using GetSMSCode again.

<https://www.listia.com/account/verify>

You have to follow the same exact process than before, but this time I recommend picking an US Virtual Number, as Chinese ones may not receive Listia verification SMS.

Listia may block the newly generated account and force it to complete the verification with a call, we don't want it to happen so if you use a Chinese number and after 2 attempts you get no codes, switch to an US one.

2. Capture a phone number

+17324408996 155

Tips:

USA number is private for every project. Like if you use number for google, other people will not capture this number again for google

If you want got used number again. Insert the Number and Click capture Phone number. Just can capture phone number that you had used at same project (Also other people can not capture number that you used).

And Got SMS from Used number price is \$0.1 / per SMS

3. Put The number into website/app to Get verification SMS

(Notice this phone number will invalid in 180 seconds)

If timeout, please capture a new phone number

4. Click button to Get SMS

☒ Auto Get ☐ Sound notice

4. Goals and Badges

As I already introduced, Listia uses an internal virtual currency that has been changed multiple times over time. Originally there were Credits, then they moved to a crypto currency called XNK, now there are PTS and PROPS... they will probably keep changing currency with time but method remains the same.

You can get some of this currency by completing goals like these ones "Take a video tour of Listia" and "Add 3 listings to your watchlist". Completing these tasks requires just 2 minutes and will grant you a larger amount of currency that will be used in the following steps.

<https://www.listia.com/goals>

My Goals

Goals are special tasks that can earn you Points, Props, and badges. Some goals are promotional and will appear for a limited time, while others are awarded to you because of your progress as a Listia user. Have fun!

 Take a video tour of Listia	reward:  5 PTS
 Add 3 listings to your watchlist 0 of 3	reward: 30 PTS
 Earn some free Points	reward: 10 PTS
 Get something with your Points	reward: 50 PTS
 Earn Bonus Props! Get a Props Reward for 5 listings today. 0 of 5 From Feb 10, 9:00am GMT+0100 to Feb 11, 9:00am GMT+0100	reward: 10 Props
 Get 25 Props for Reloading your Points! From Feb 10, 9:00am GMT+0100 to Feb 11, 9:00am GMT+0100	reward: 25 Props

What covers a great importance inside Listia are badges. You can regard them like awards that are listed in your profile and provide you with a trusted aspect.

<https://www.listia.com/badges>

Verifying Listia via mobile and linking it to a verified Facebook account already granted you 3 badges: "Verified 1", "Facebook Connect" and "Phone Verified", which are good to start with. That's why I provide instructions to complete SMS verifications.

However, to complete this method you need higher badges, in particular you will need these three ones: "Wings", "Seller Wings" and "Trusted Seller":

**Wings**

Get your wings and fly! Users with the wings badge have received 5 positive feedback ratings, given 5 feedback ratings, listed at least 5 auctions and been a member for 20 days.

**Seller Wings**

Before earning a Trusted Seller badge, users earn their Seller Wings! This badge requires 5 positive seller feedback ratings, 5 listings, and a 90% positive seller feedback rating after being a member for 20 days.

**Trusted Seller**

If a seller sports this badge, they've received at least 15 positive seller feedback ratings and maintained a 95% positive seller feedback rating after being a member for 20 days.

The reason these badges are important is simple: each time an auction ends, listia credits won't be immediately transferred to seller profile unless he has these badges. This has key importance for the final step of this method.

Owning those badges allows you to get a variable percentage of the winning bid directly in your account, making you able to spend credits immediately.

"As your reputation as a seller gets better, the credits from some of your listings may be immediately transferred to you, bypassing the pending state. Over time, as your reputation continues to improve, the amount of credits that immediately transfer increases." - Listia Blog

In order to get them all, you have to:

- Collect at least 15 positive seller feedbacks (I suggest to push this to 25-30)
- Win at least 5 auctions and release feedback to seller
- Create at least 5 auctions
- Be 20 days old member

Don't worry about the last point, you needed multiple browsers to work with multiple accounts. You must always have an active account which is 20 days old and ready to be used.

About feedback, the only way to collect it is completing auctions, so let's familiarize with the listing page:

<https://www.listia.com/list>

5. Creating an Auction

One time it was possible to sell everything at Listia, so I was usual to sell cooking recipes in order to collect many positive feedbacks. Today things changed a bit and you can sell digital goods only if they expire after first usage and cannot be freely collected. The screen below is an example of invalid auction that will be junked.

The screenshot shows the Listia 'Create Listing' interface. The title is 'Warm butter beans with rosemary & garlic'. The category is 'Books > Cookbooks'. The description is 'You will receive the steps to cook and serve this dish to your guests at your desired email address. Enjoy!'. The listing type is 'Auction' with a start bid of 'free up to 499' and a duration of 3 days. A tip box suggests adding photos and free shipping. A listing summary states the listing is free and the seller will earn 100% of the highest ending bid.

Listing Summary
This listing is FREE. You will earn 100% of the highest ending bid!

After reviewing new Listia's guidelines, I've noted this down for what concerns digital goods:

In order to list an item with digital delivery, **it must meet one of the requirements** below:

1. The item can be used or claimed, and upon use, no longer has value and cannot be reused. Examples include ultraviolet movie codes, gift cards, rewards codes and subscription codes for services like Xbox Live.
2. The item being listed is a cryptocurrency and delivery is an on-chain transaction from the seller to the buyer's wallet (Email addresses will not count as on-chain transactions).

It means that you can only sell digital goods if they will expire after being redeemed (e.g. are not "unlimited" codes that can be used without limits) or you can sell cryptocurrencies (e.g. silly ones like dogecoin or even better, tokens).

You have to pay attention to this because your Listia account may be suspended if you break this rule.

**Non-genuine listing was removed**

Hi Mike4108,

Please note that a listing warning has been applied to your account for listing items that were deleted after being deemed to be fake and/or junk.

A junk listing is one that doesn't appear to be for a physical item and is missing pertinent details about the item. We reserve the right to delete listings that appear to be duplicates, illegal, fake, fraudulent, misleading, or incomplete, at our discretion. We also reserve the right to delete any listing that we deem inappropriate for Listia without notice or explanation. For further details please visit: <https://www.listia.com/rules>

Please note that this is a one-time courtesy warning.

If you have any questions, please submit a support ticket and we can help!
<https://help.listia.com/hc/en-us/requests/new>

Sincerely,
Listia Member Support

In general, this is a list of items that can you can put on auction without issues:

- Digital codes used to download content (movies, games)
- Airsoft guns accessories/parts/bullets (plastic ones)
- Lighters
- Toys
- Photography of artistic or scenic quality (write you will send a physical print)
- Services with a tangible custom item that end up as a product (use your fantasy here)
- Mouse pads / Old mouse
- VHS
- Simple bracelets or rings
- Old hardware components
- Table-sports accessorie (like table-tennis balls)
- Children pencil sets

Remember to follow the golden criteria I'm leaving below:

I'm suggesting to sell essentially nothing that people would pay attention to because your items must not get any attention from any generic Listia member. Collecting feedbacks requires that your auctions must end with a winner, and I'm going to provide you with one.

This may still not make much sense to you, but it will be clear going on with the guide. That's why I recommend to re-read it and familiarize with content before starting to use the method.

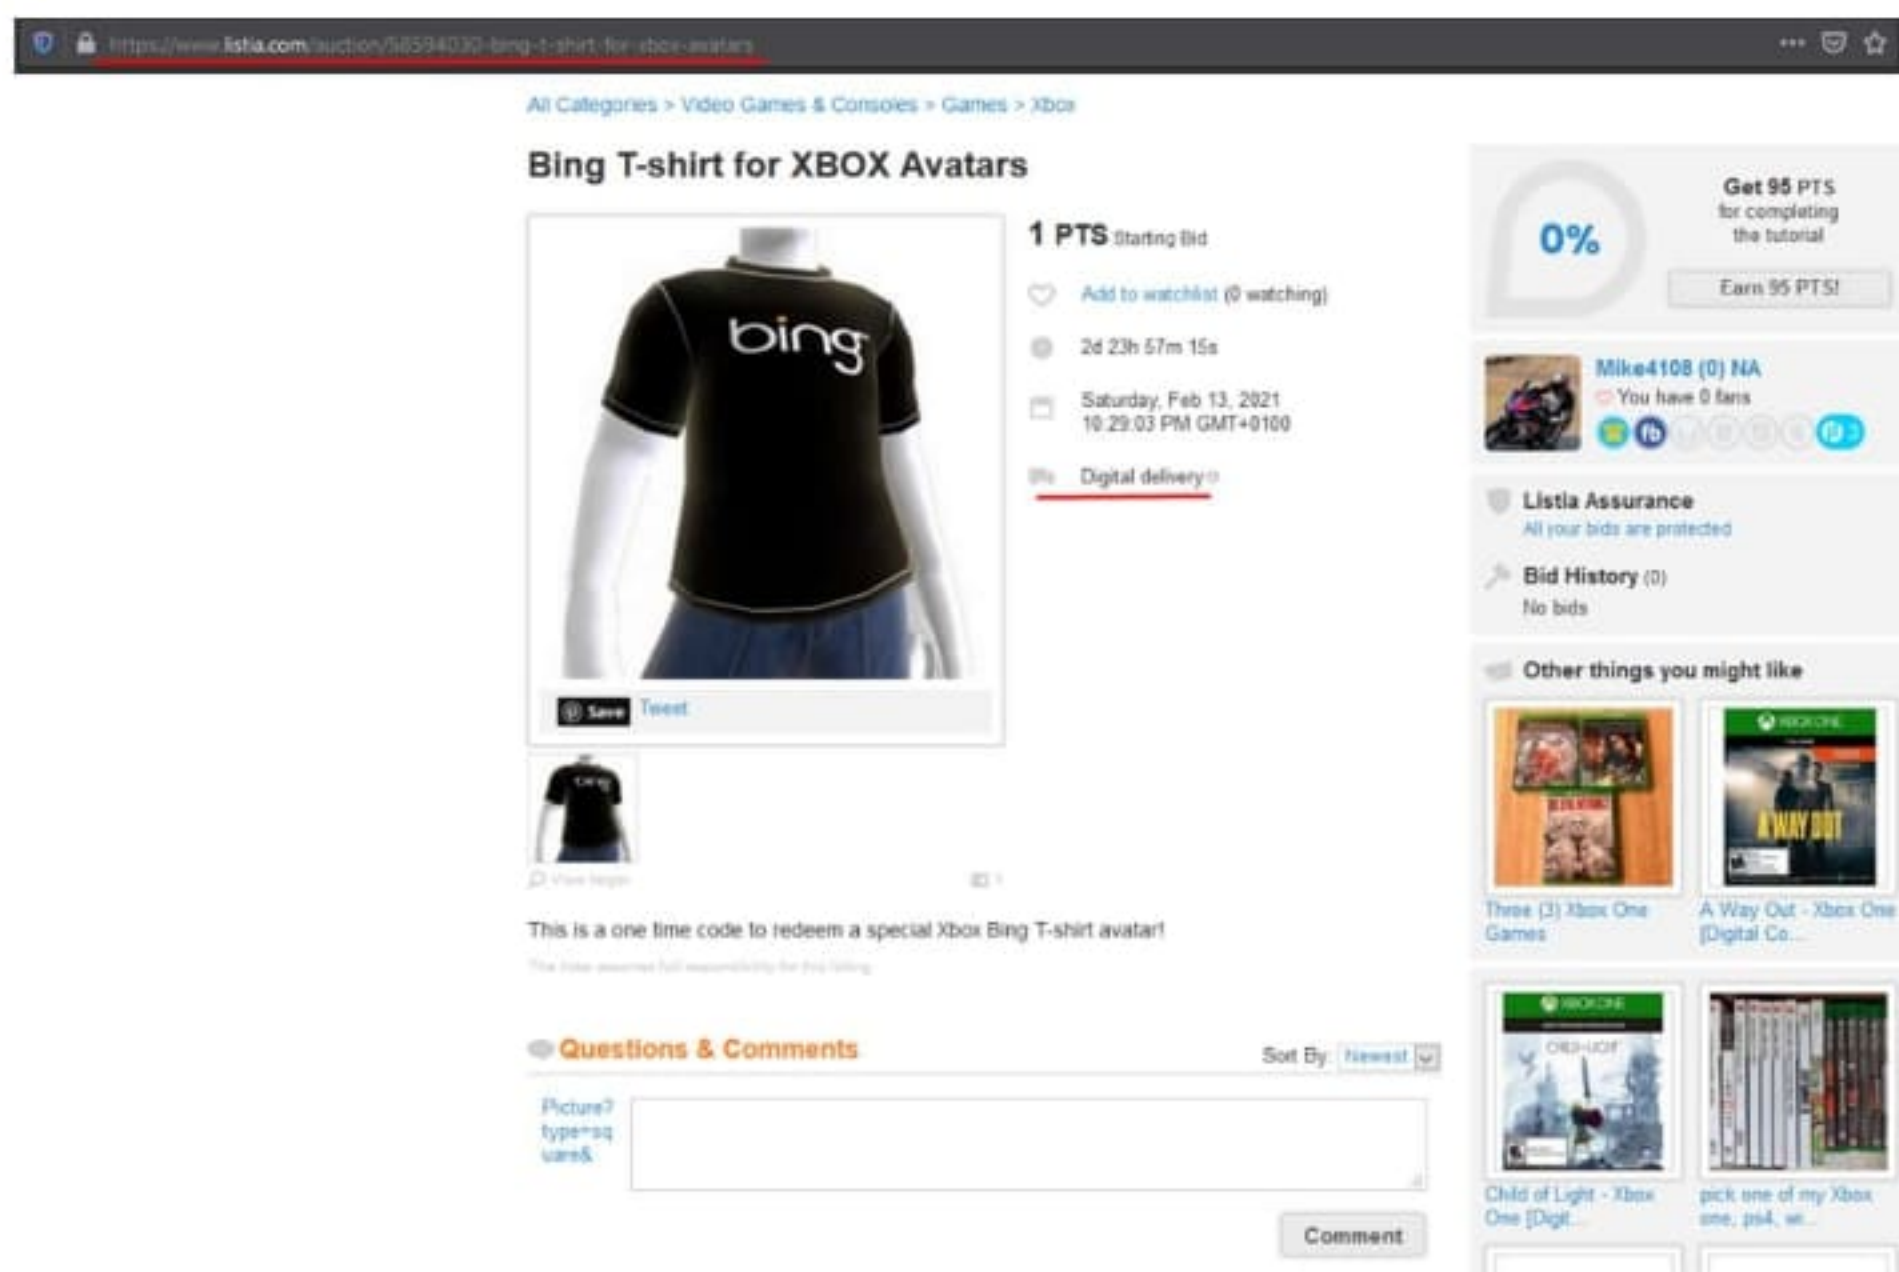

6. Feedback Trading

Let me show how to quickly create a new listing. Take one of the products I suggested a couple pages above, make sure to set auction end in 3 days (minimum time) and that the checkbox saying "Automatically relist my item if no one wins it" is checked.

Title *	<input type="text" value="Bing T-shirt for XBOX Avatars"/>
Category *	Video Games & Consoles > Games > Xbox
Photo	<div></div> <p>★ Your first image will appear in search results!</p>
Description	<div>This is a one time code to redeem a special Xbox Bing T-shirt avatar!</div>
Listing Type *	<div><div>Auction</div><div>Fixed Price</div></div> <div><div>Start Bid</div><div><input type="text" value="1"/> PTS</div></div> <div><div>Get It Now</div><div>Unlock this option by getting your Seller Wings badge! ⓘ</div></div> <div><div>Start Time</div><div><input checked="" type="checkbox"/> Start this listing right away</div></div> <div><div># of Days</div><div><input type="text" value="3"/> ▼</div></div> <div><div>Auto Relist</div><div><input checked="" type="checkbox"/> Automatically relist my item if no one wins it</div></div>

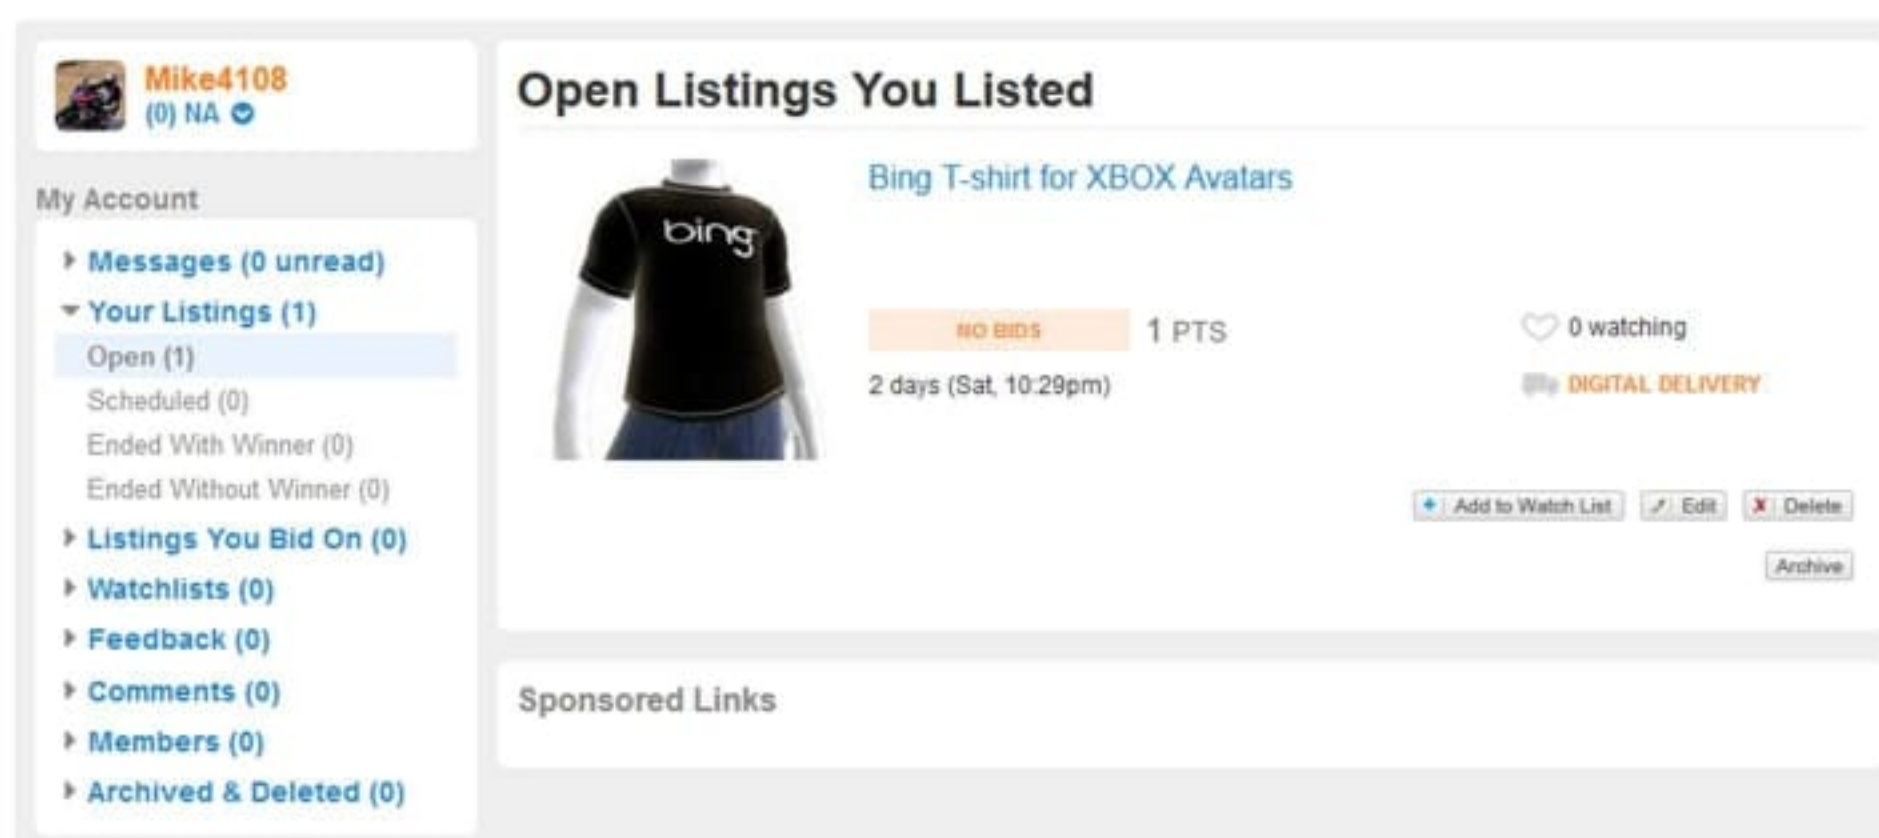

Done! Your auction has just been posted. Share the Listia URL with your friends/inside your feedback exchange group, then wait for somebody you know to place a bid.

NOTE: If you're alone, you have to use multiple Listia accounts to bid on your auctions. This way you can let your accounts grow together. Remember that each account must have its own IP (use a VPN/proxy, like you will see in the final chapter).

You can monitor your active listings in your profile page:

https://www.listia.com/account/auctions_listed

Now repeat, do the same for other 4 auctions. Create up to 5 new auctions every 3 days and keep sharing their links to exchange feedback.

You need to collect at least 15 seller feedbacks, even if I suggest to get 25-30, while waiting until your account becomes 20 days old. During this step it's important to scale up and work with multiple accounts so that you won't have to wait doing nothing.

YOU SHOULDN'T MOVE TO FOLLOWING STEPS UNTIL YOU HAVE GOT THE BADGES

Once you've got the badges, you can visit the rewards Store and proceed with the method, even if I suggest to collect more feedbacks than the necessary ones to improve your overall rating.

<https://www.listia.com/rewards>

Rewards Store works in this way: every day Listia Staff creates special auctions, where Gift Cards and other goods are sold to site members. These auctions work like each other, meaning that you have to place the highest bid, win and wait for Listia to send you the code.

The screenshot shows the Listia website's Rewards Store. The top navigation bar includes links for 'Get Points', 'Redeem Points', and 'Get Started'. The main header features the Listia logo, a search bar with 'amazon' entered, and buttons for 'All Categories', 'Browse', and 'List Item'. Below the header, the search results for 'amazon' are displayed, sorted by 'Ending Soonest'. A sidebar on the left lists various categories like Antiques, Art, Baby, Books, etc. The main content area shows six auction items, all of which are Amazon gift cards. Each item card displays the gift card image, its value, the current bid in Listia Points (PTS), and the time remaining for the auction. The items are:

- \$5 Amazon.com Gift Card: BID 3,025 PTS, 54 minutes remaining.
- \$10 Amazon.com Gift Card: BID 6,115 PTS, 2 hours remaining.
- \$5 Amazon.com Gift Card: BID 2,665 PTS, 3 hours remaining.
- \$50 Amazon.com Gift Card: GIN 37,999 PTS, 6 hours remaining.
- \$50 Amazon.com Gift Card: GIN 37,999 PTS, 6 hours remaining.
- Amazon Gift card 5.00: BID 10,000 PTS, 7 hours remaining.

Each item card also indicates that the gift card is 'DIGITAL'.

When Listia was created, the system wasn't like this and you could simply press a "buy it now" button to get your gift card for X credits.

Right now, you must have at least (this is purely indicative and will change with time)

3000 PTS to win a \$5 Amazon Gift Card

6000 PTS to win a \$10 Amazon Gift Card

12000 PTS to win a \$20 Amazon Gift Card

But you don't have that many credits in your account, right?

It's time to teach you how to get huge amounts of credits to be used for your gift cards.

7. Hammer Auctions

You need to create expensive auctions, listing goods like Apple products, Games & Consoles, Upcoming Mobile Phones, Valuable Clocks, Gift Cards.

You can use your own goods: just take a picture of these with a piece of paper below, including date and your Listia username. This will bring people to believe that the listing is legitimate, especially due to your highly trusted badges and feedbacks in your profile. They will not only bid without hesitation, but also place high bids!

If you don't have any valuable good and can't get one from your parents or friends to shoot some pictures, then you must look for product pictures at Google and edit them so that people won't be able to understand that pictures aren't original (by performing a reverse image search for example).

Please note, you don't have to share these auctions with friends. These auctions have to be used by you and you alone to cash out.

To bulk your amount of credits you must instead sell goods that will get the attention of other site members, they're the target at this point of the guide.

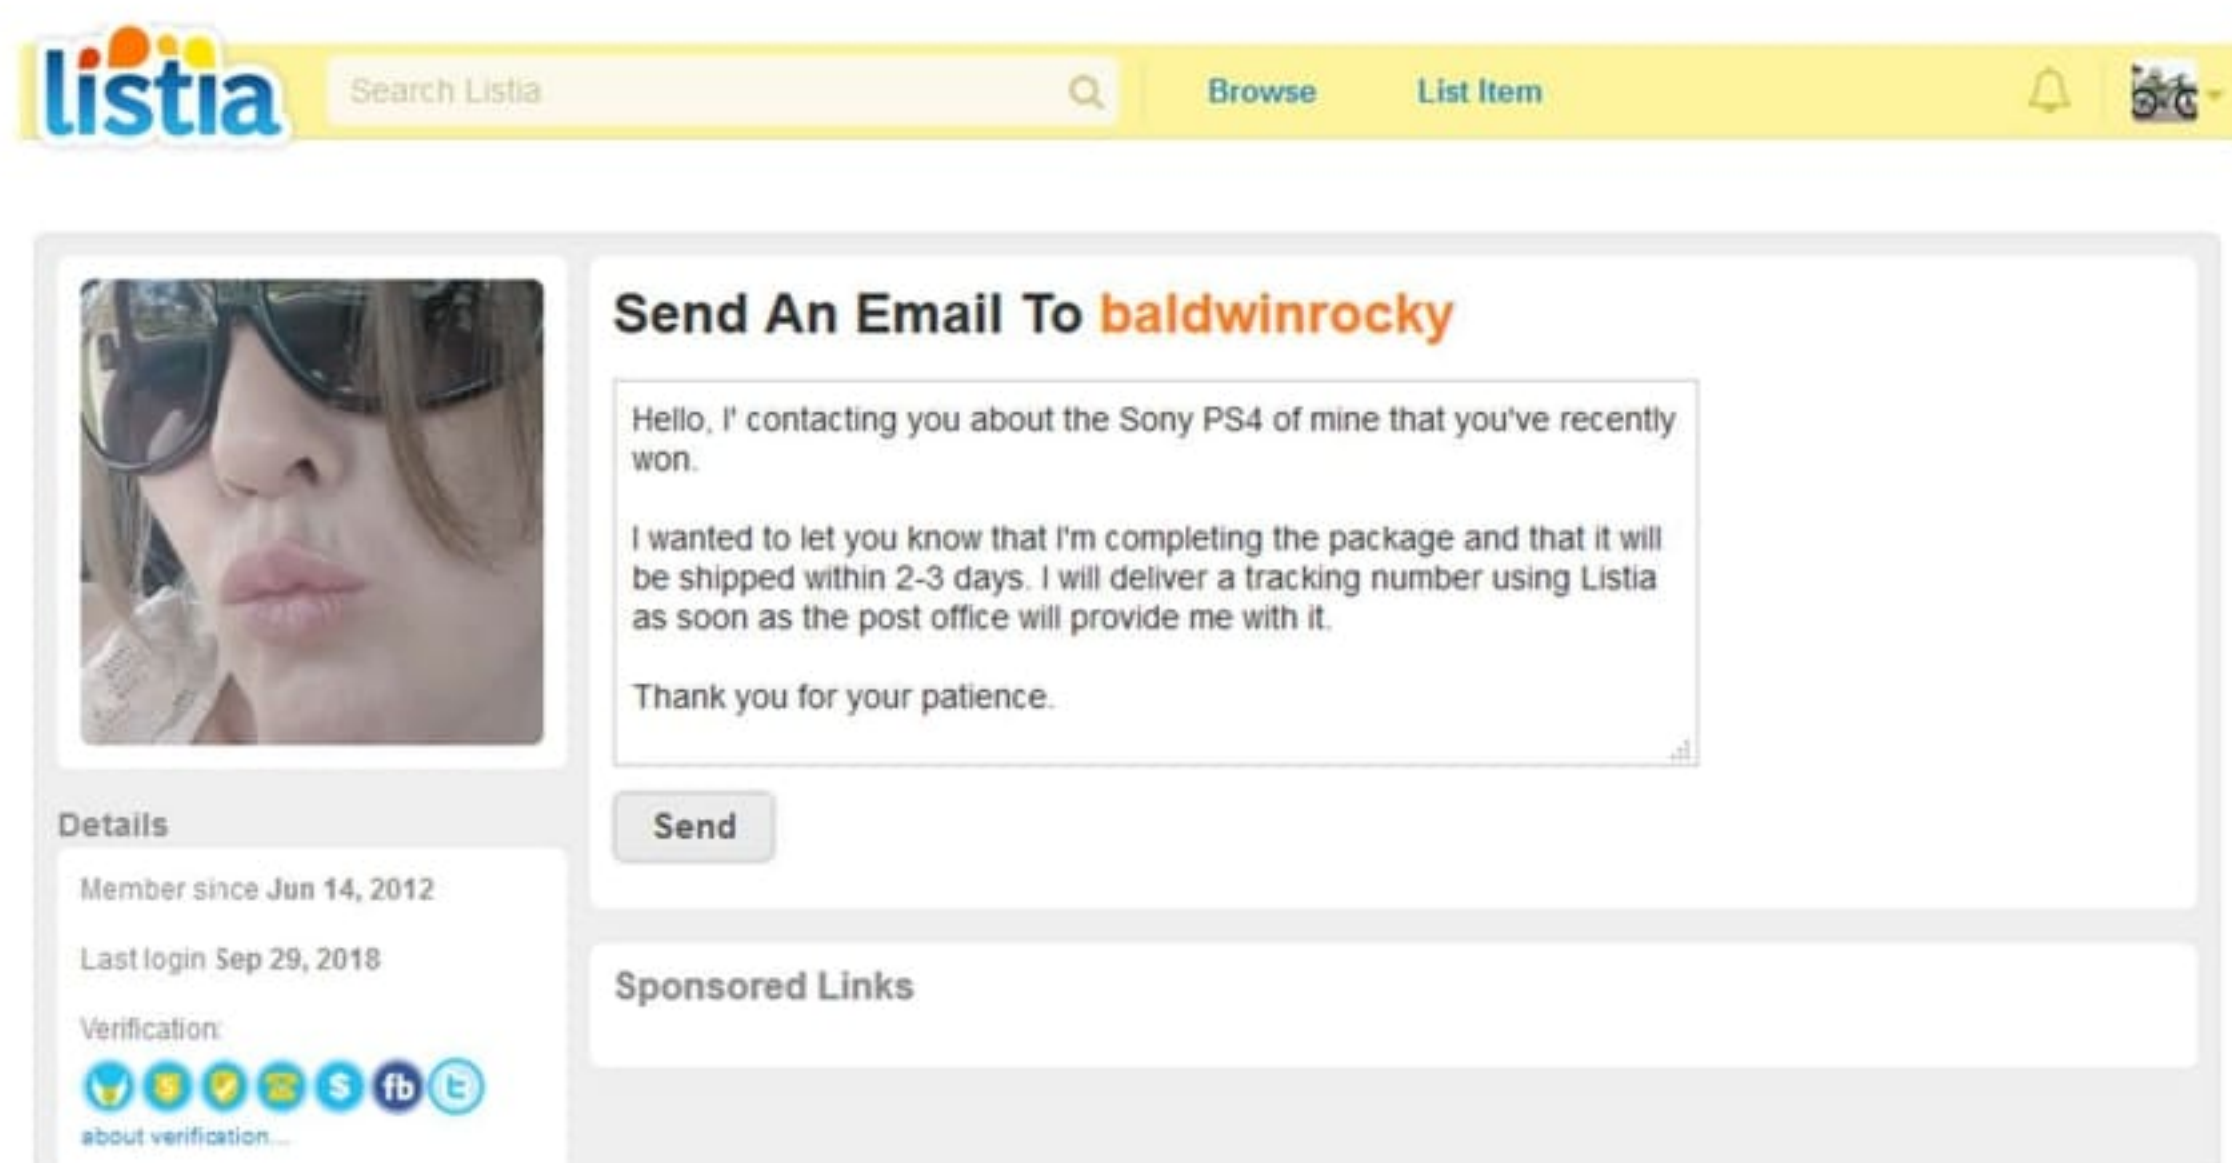

Listing this kind of expensive goods you will collect lots of credits, but only a part of those will be immediately moved inside your Listia balance, that's why it is important to collect more than the 15 positive feedbacks required to get "Trusted Seller" badge.

Let me repeat, once again: the higher seller feedbacks you have, the higher percentage of credits will be moved inside your account at the end of your auctions.

This applies to every auction of yours that is won, so create multiple ones in order to get more credits.

When your auctions will be finished, send a private message to winners asking for shipping details, as if you were really going to ship your valuable goods.

Take time claiming that you will ship within 2-3 days and deliver a tracking number, this will grant you extra days to get credits from other auctions you created.

8. Redeeming your Gift Cards

Once you've reached enough credits, look for the first reward auction going to end, place your bet and win the Amazon Gift Card sold by Listia.

As soon as Listia Staff delivers the code (usually within 24 hours, via private message or email), forget about your current Listia account and disappear.

Soon, the winners of your previously created listings will open a dispute because you didn't deliver any item. Credits will be reverted to their accounts and your current Listia balance will go in negative because you've already spent all credits. No real people gets damaged by your trick, you're just "borrowing" their credits for your interest.

Clean browser data (cookies, cache, saved data) then start from step zero with the same browser.

9. Using a VPN

Since you have to repeat this method I suggest you to install a VPN software. There's no need for high anonymity, so you won't have to buy a premium VPN with dedicated features. You only need to hide your real IP so that Listia can't ban all of your profiles. Here are some free VPNs that I can recommend.

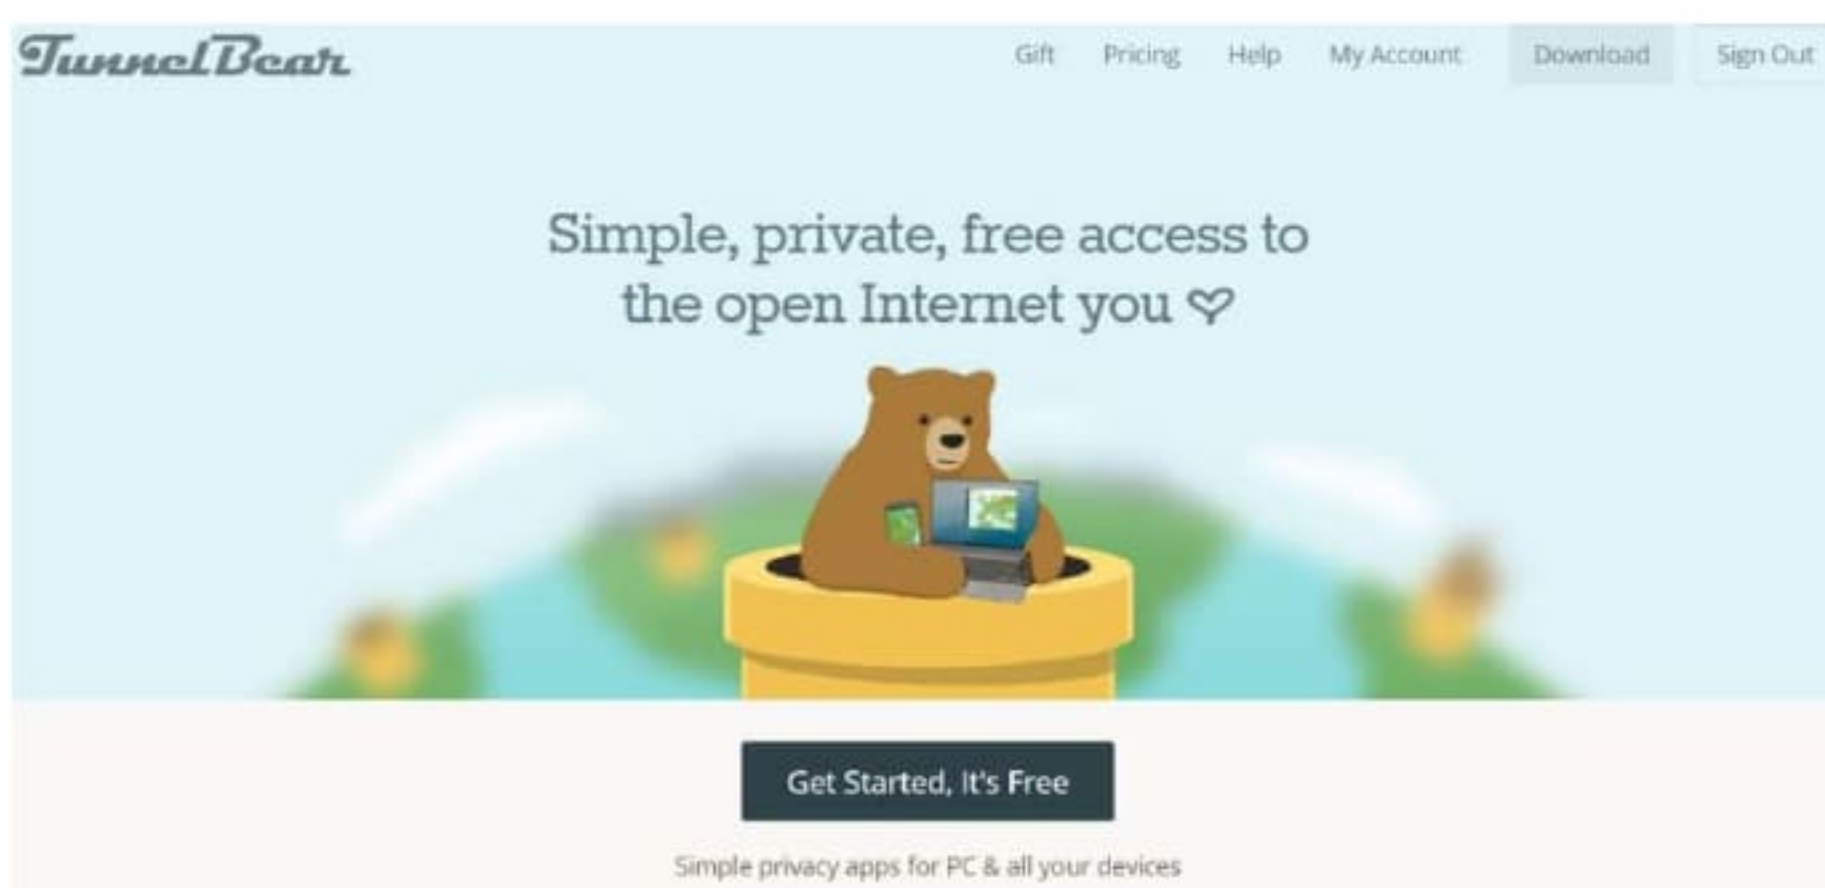

ProtonVPN is a good VPN, it has a free version with limited Countries but it's more than enough to begin.

<https://protonvpn.com/free-vpn>

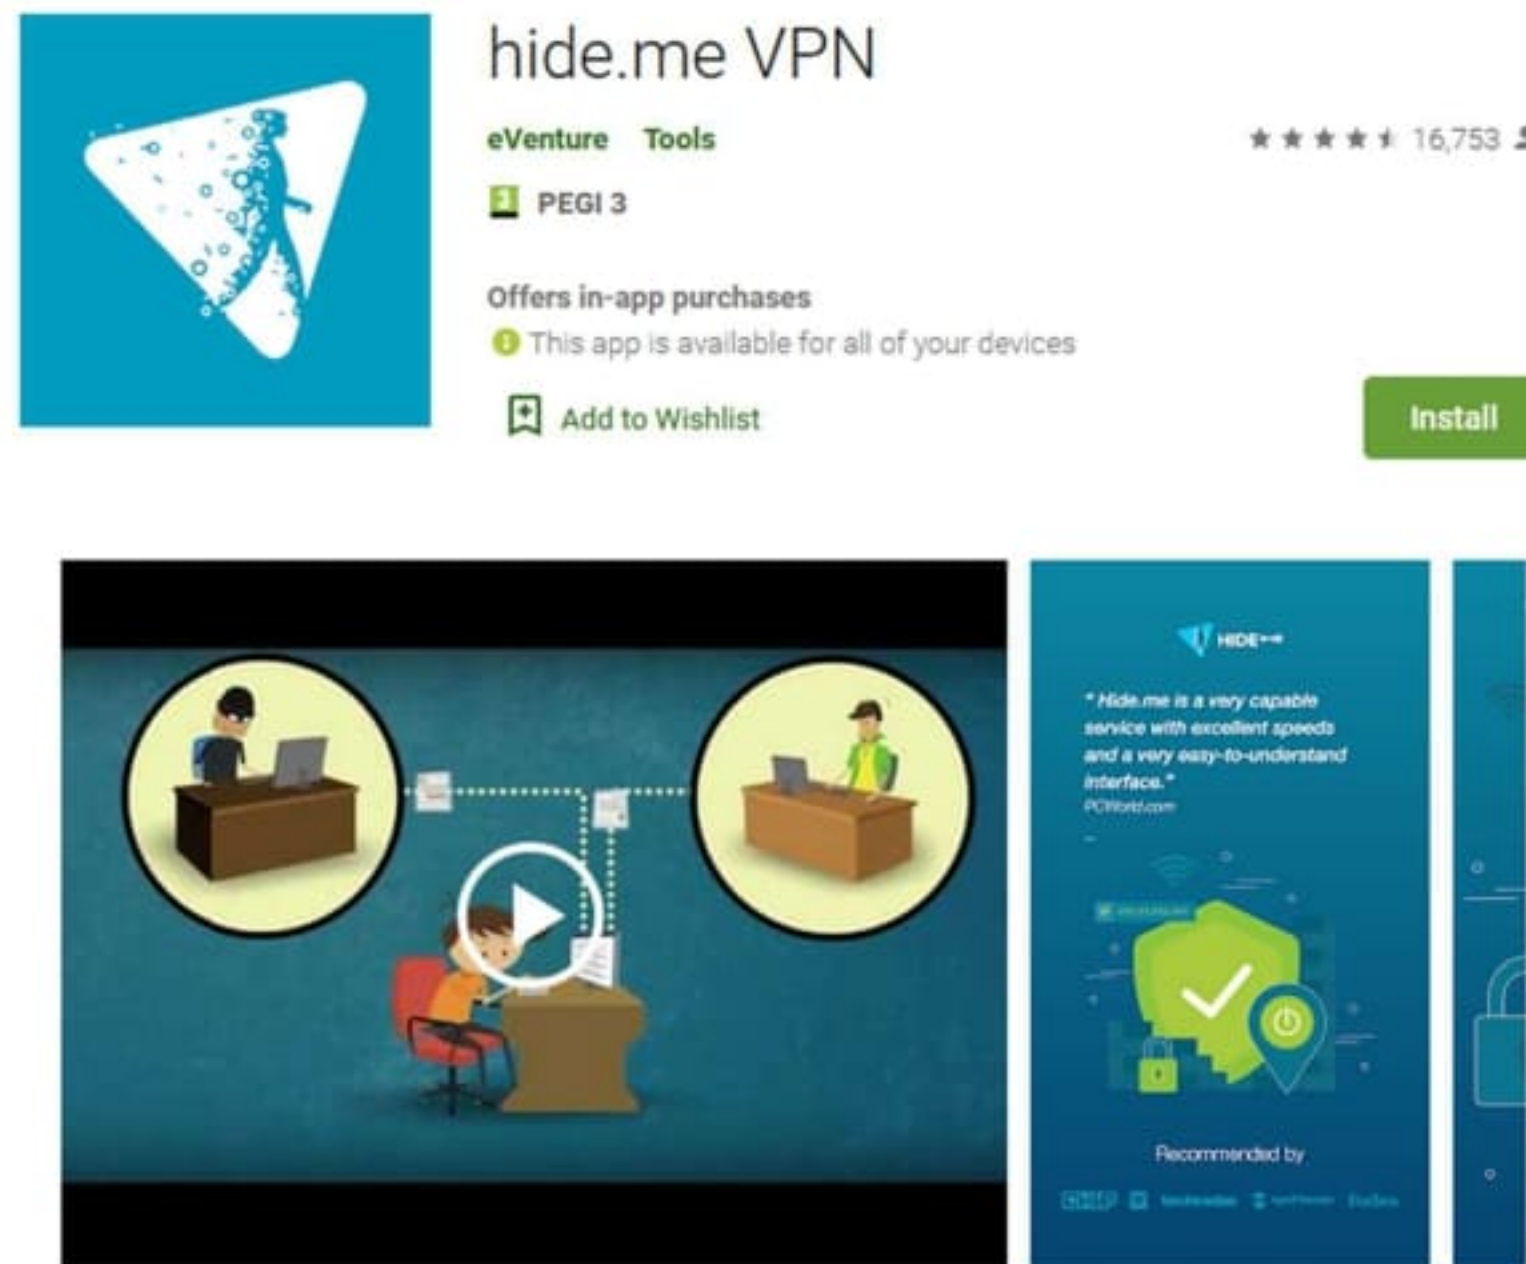

TunnelBear is a less known provider, it has a free plan with limited monthly traffic but it provides dedicated Opera and Chrome addons, allowing you to hide traffic specifically for those browsers rather than globally, which is good to manage multiple accounts at the same time.

<https://www.tunnelbear.com>

Another option, especially for mobile users, is hide.me VPN. It has a limited number of servers that are FREE to mobile users, while you can get a temporary trial when you register a new account:

https://play.google.com/store/apps/details?id=hideme.android.vpn&hl=en_US

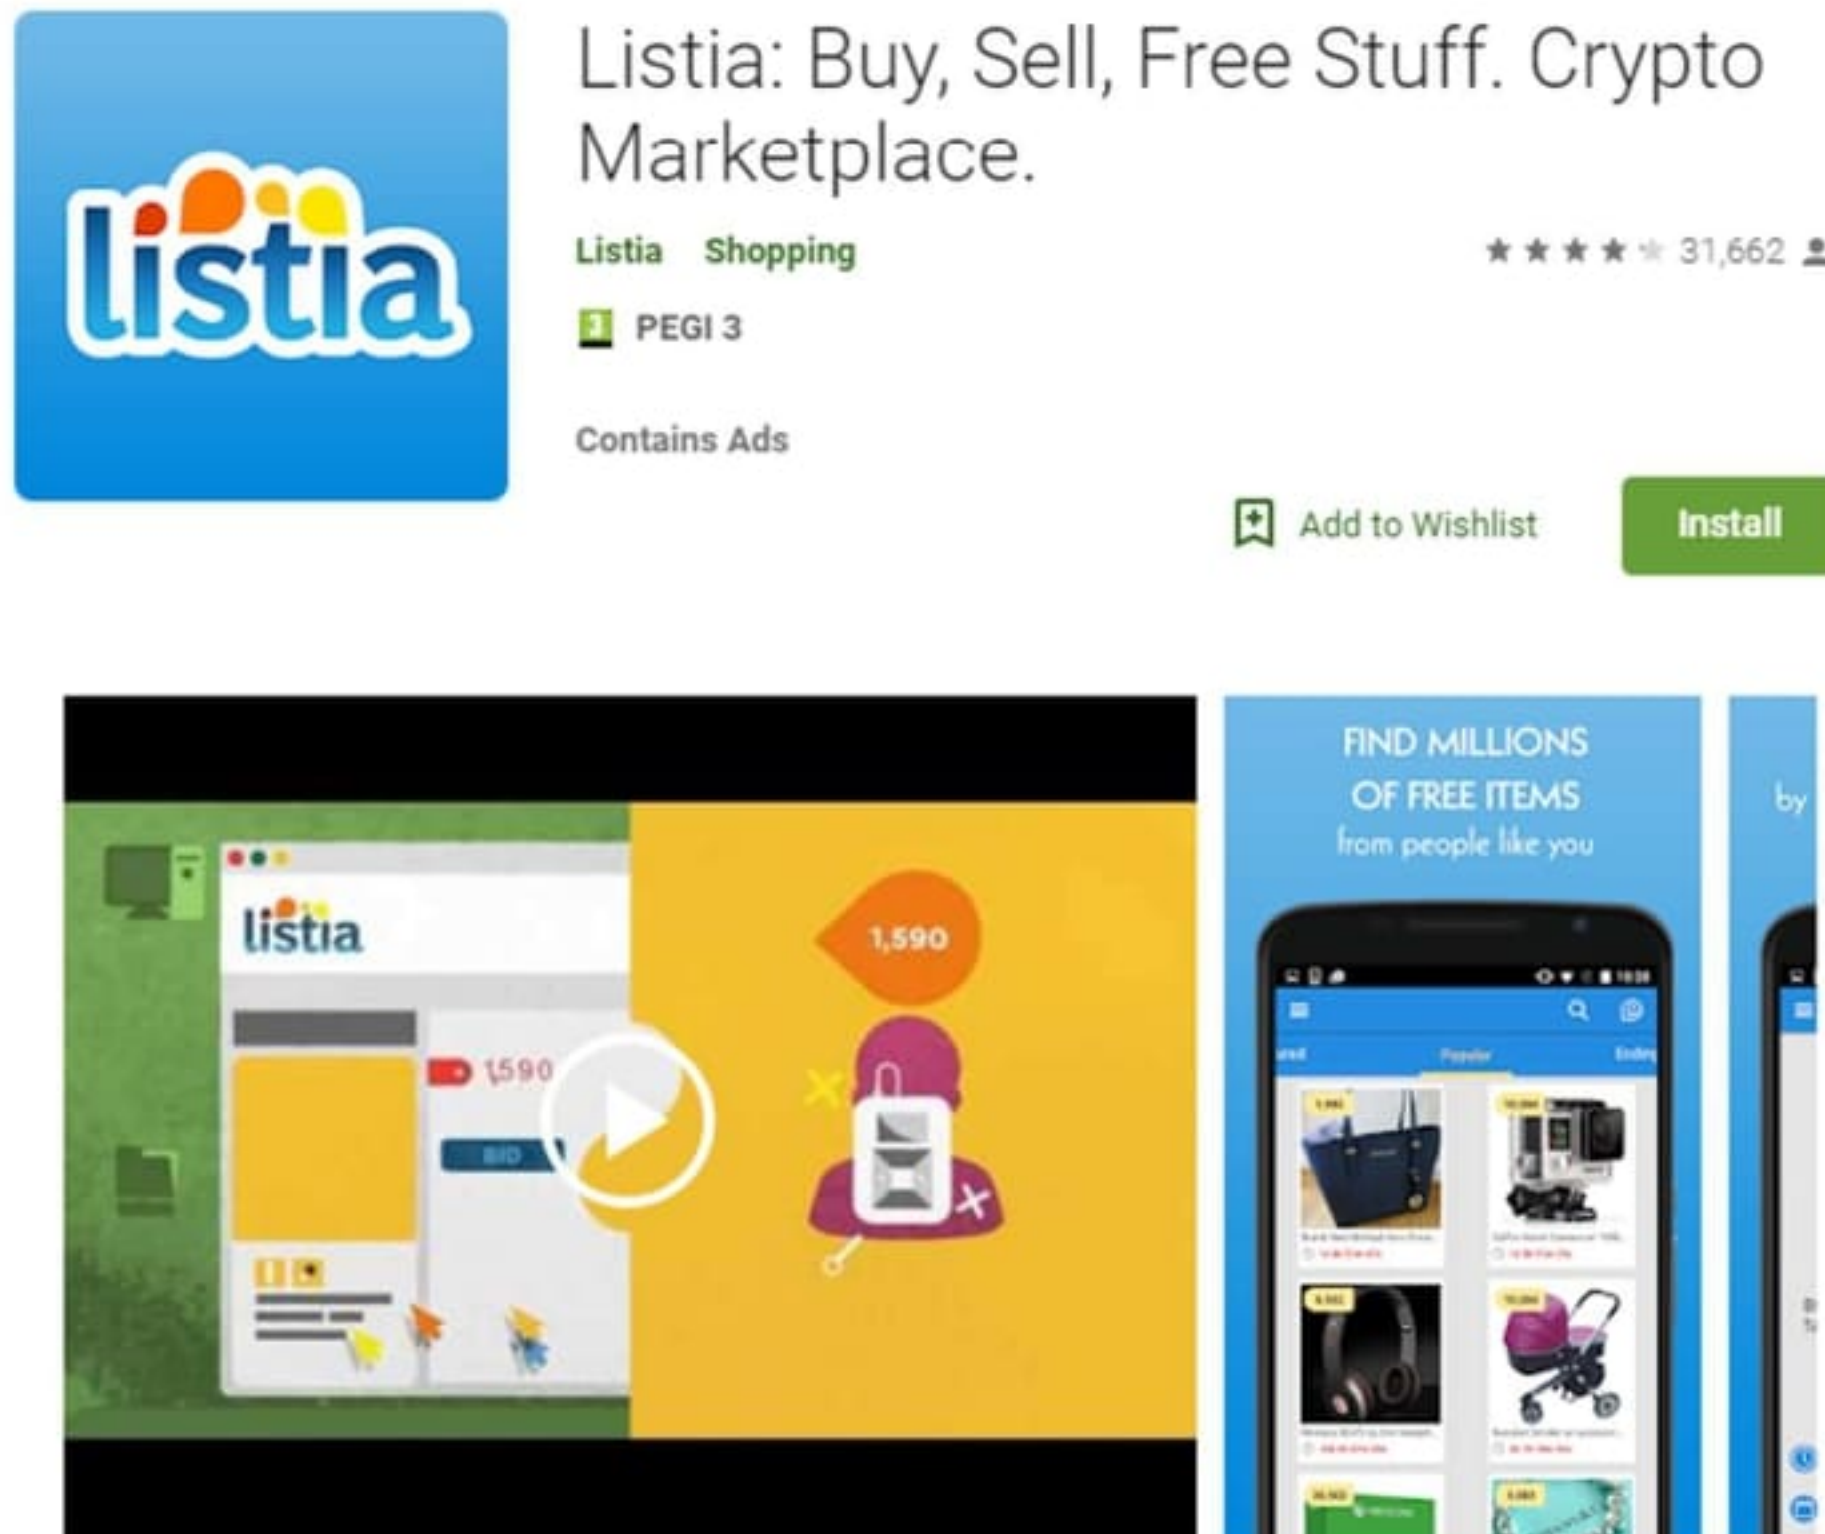

The issue with free VPNs is that the number of servers is limited, meaning that soon or later you will need access to more locations. At that point you will have to switch to another provider or get a paid plan. You're free to use proxies rather than VPNs.

10. Listia Mobile

We've reached the end. The last suggestion I can provide you is about using Listia apps in addition to browsers. They will allow you to manage one or more profiles from your smartphone/tablet too. Here are links to both Play Store and App Store:

<https://play.google.com/store/apps/details?id=com.listia.Listia&hl=en>

<https://apps.apple.com/us/app/listia-buy-sell-and-trade/id429870253>
