

# *Carding via Phone - How To Disguise Your Voice*

I have been using this method for carding via phone for some years now and it has worked perfectly.

Because I care about my security, I do not wish to have my own voice recorded while purchasing high-end items so I simply use a program called "Natural Reader" that enables you to type any text and get natural sounding voice saying it.

You have to have all or at least some mp3s saved with

questions/answers that they might ask you - this is all self-explanatory, extra work is needed.

Play the mp3s over the VoIP (best way) when calling. You can also mention you have delay in conversation so in case the person on the other line asks you question you do not have ready answer ,to give you time to type it fast and play it to them. Remember to get all your CVV/Fullz details voiced and ready to play it to them.

Cracked version of [Natural Reader v12](#):  
[Virus Total Scan](#)

Instructions:

Note: Disconnect from PC first.

1. Install Setup.exe

2. Register with included serial.

Enjoy !

If you like the software, do buy it.

Serials below:

C9TLH3M2NTZGQCE9

N0YFN2P4NIGGCZT9

R4QIX0R6NSTGGVF7

H4TYJ7V3NJKGSWC1

Z2SMZ2N2NAOGEKM8

T6WFR2X0NAGGAIO6

The file does not seem to be packed with anything but just in case, always run unknown files in virtual machines + sandbox !

Happy Carding.
