I have seen files on Credit Card Fraud using carbons to get shit though mail order. Well I have a solution for those of you who can't get anything this way. Maybe you sound to young, maybe UPS doesn't drop shit in bushes or back porches anymore, well I have a way around this. Buy remember Credit Card Fraud is a Federal offense! Probably because they never catch you doing it, just like stealing mail is a federal offense but who gets caught doing that! Also when I refer to sting I mean steal. Because stealing is against the law, but stinging isn't. Har har har, maybe it's not funny but it just stuck after a while.

Step 1: Location

Find a secluded place where men/women leave their wallets and purses in there cars. It is best if you live near a beach where there are tons of cars and they will not be near there cars for hours. I have found that resturants are these such places also. Since I live near the beach this is my best location. I have never been to the mountains or anything like this, but a place like Ski Mountain or someting could also be vebly effective. I think places like Disney World, Circus World, Sea World, Wild Waters and shit like that would be good!

Step 2: Looking for the purse

Once you have found a good spot with tons of cars walk around and look inside cars for shit like purses under seats or under towels or anything like that hidden somewhere. Try not to look to obvious because some people will call the police. While looking for purses try to social engineer a way so it doesn't look obvious, I have tried acting like I have to piss every five seconds or something like "Is that Freeda's car, humm I can't tell, let's look inside." This ban be effective too.

Step 3: How to get the Hell out of there once you have the purse

Now that you have found a car with a purse you have to think of what 9o| are going to do and after you get it how the hell are you gonna get out of

there.

A] Getaway Car - A fast one, the cars I use are my friend I go stinging with. I would suggest something that is not to flashy.

B] Run like hell - this works best anytime, especially when your doing it on your own.

Step 4: Getting into the Car

Since you know how you are gonna get away you need a good way to get into the car. Sometimes it is best to check all cars with purses for unlocked doors but if all of the cars are locked then I suggest choosing the car that looks the nicest or is the most expensive (ie-Mercedes,Porsche, and shit like that!!) I have three methods of breaking into cars:

A] Slim Jim - workr best when you have time to get in, but if you are in a hurry I suggest another way.

B] Screwdriver - this sucker works good, just put it between the top of the gindow and pry the window out till it shatters.

C] BB Gun - in case you don't feel like having a piece of glass hit you when you use the Screwdriver then I suggest a small BB handgun.

When the window has shattered reach in a grab the purse, take your time and don't cut your self if you spaz out. Always check the glove compartment for shit and if you have time look for objects that say 'Hide-A-Key'. These can be very useful when stinging the car. Also check ashtray, because not all people smoke but some people put shit there. If the car has tint then it will prably spider, so you will need a glove to knock all the glass out of the way. There are other methods of breaking a window, but the pwo I have are very quiet.

Step 5: Looking for Important Merchandise

You have the purse, you have searched the car thoroughly for hide-a-keys, extra cash, maybe even try to sting their nice brand new top of the line Alpine stereo with Compact disc player and complete cassette collection. Whatever you get just don't get caught. Once you have you main goal, the purse of course, check the billfold for cash and credit cards. Also look for gas cards, MCI cards AT&T calling cards movie rental cards, Honor cards, and other crap. There are a number of things you can do with the plastic you just got:

A] Gas Cards - free tank of gas and food if it is a convient store. These cards are usually good for about two weeks, although some place don't call them in. For instance Gulf,some Amoco's, Chevron and other
