

Elite Carding.... The Australian way to do it!!!!

In this file, i will try to explain the REAL way to card, and the way that will bring you REAL results. These methods have worked for me and as a result i have managed to aquire some things that i have always wanted. Who am i?? That i will not say, as i dont wish to have my ass kicked one day, but, ive had some TERAbly good fun doing it.

1. HOW TO OBTAIN YOUR CARDS.

The best and most effective way to obtain cards is by 'trashing'. Now, ive access to some good supplies to cards, but you must remember that sooner or later, they will figure this out and bust your mutherfucking ass.

The best time to go trashing is on a friday or a saturday night, ive found that the best areas are places that have older style shopping stores, with laneways at the back, the newer complexes like westfields etc are really shit as they just throw ALL the garbage in the one big dumpster. Arm yourself with a few little tools, like screwdrivers, torch, backpack and a good warm coat, be ready to have some kick ass fun. The best time is about say 10pm-1am, just go with some of your mates and walk behind the stores and just choose the stores that take credit cards etc, like electronic stores, clothes stores etc , the nicest are florists, as everything is smelling nice.

Sift through the rubbish, if it is food scraps , leave it, anyone can do without that kind of hassle. Look for the carbon slips, unfortunately, or should i say fortunatley for Us, most places are to dumb and dont ripp them up yet, as they are supposed to.

Be careful to watch out for the police and security patrols, most of the time you can make up a shit excuse, but if they search your bag and find the carbons, your FUCKED!!!!!!!!!!!!!!!!!!!!!!

2. GETTING HOME WITH THE CARDS.

When you get back home, after paying a stupid taxi driver coz all the fucking trains stopped operating at 1am (fuck the stoopid SRA!!), read the carbons and take down the important information, DONT throw these carbons out with your normal trash, or you could end up getting busted that way, its a low chance, but a chance none the other!! Now as you know, in australia, we have Bankcards, Mastercards and Visacards, American Express is not that popular and more risky to use. the folling table illustrates the popular card types...

56xx xxxx xxxx xxxx	:	Bankcards (5610 5353 is C-Wealth Bank)
5353 xxxx xxxx xxxx	:	Mastercards
45xx xxxx xxxx xxxx	:	Visacards (note to check for GOLD cards that begin with 4966 AND have a small PV (PremiumVisa) on them)
3760 xxxxxx xxx	:	American Express

At this point you are ready to make your order.

3. ORDERING

To order, you must choose a house that is vacant, this can also be a house a

which has people that work and are not home during the day. First TYPE some bullshitty crap letter about that you are a company and fucked up and if the people could just leave the goods at the front door, ill leave it up to you to think up some little scheme and idea, its basically simple though.

Next just ring up and make your order, if they ask you for a phone number, tell them that you are a worker on call and cannot be contacted during the day, give them a bullshit number and say that they can ring you after 7pm , most of the time they will never worry. Order the goods to the house by COURIER, and check it every day in the afternoon about 2pm. If you see the parcel, get it , if you dont, dont worry and try again with another card and another company, obviously your order screwed up.

4. IMPORTANT HINTS AND TIPS.

- * Dont choose a house that is in an area close to you, they will eventually bust you if you do, these guys are not dumb.
- * Never keep any aspect of your carding constant, never use the same company, never go for the same types of goods, dont screw up etc and dont do anything stupid.
- * Checking the credit on the cards at the moment is a bit difficult, the easiest thing to do is too just chance it, but this isnt good, a better way, and the way i currently use, is to phone up the person and make some bullshit about that your from the bank etc and generally you can find their d.o.b and credit limit, calling up the bank with these details will allow you to find the current balance on the card, or you can just bullshit the person via many different ways, ie say that they made purchase and that the card is invalid, and they will say 'what the hell??' and say 'what remaining credit did you assume you had?' and you can fuck them up in that way.
- * Remember one thing , dont keep all of the stuff you card, sell it, so if you do get busted one day, they cannot prove that you carded the other \$100,000 worth of goods that has been done in the past few months. Dont use the same area all the time, this just exemplifies the problem.
