

## **Cashing Out A CC With Skrill**

November 2014

Today we will show you how to verify your Skrill (aka MoneyBookers) account. Please note this method works only with USA Skrill, if you wanna make Eu Skrill you are to verify the CC using microdeposits, e.g. you would need EU enroll or bank account with card details.

So let's get straight to the subject, I won't describe how to properly set up your system (use Didi/SSH/socks, change your time zone etc etc) as there already are lots of articles about this here and there.

### **Account verification**

In USA skrill there isn't any CC microdeposit verification, but you are to verify your identity and for this you should have the following info prepared in a txt file:

Full name: MCPHEETERS, MARK A

Addr: 13815 W SOLANO DR

City: LITCHFIELD PARK

State: AZ

ZIP: 85340-5324

ssn 305021329

dob 04/08/1976

You don't need any background/credit report or anything else.

So if you have this info which could be bought for \*\*\*36;1 somewhere, go to the [skrill.com](https://skrill.com) website and create an account using that information. You can specify any valid cell phone number as there won't be any call/SMS as far as I know.

After registration is finished, verify your account(hint: click the link to see screenshot).

Now enter again the email & DoB that you used during registration. If skrill now asks you to enter the SSN then it failed to look you up in its database. That means you won't be able to use this trick and will have to submit documents or just throw this account and try your luck with another fullz

If you're lucky and Skrill successfully found you in the database, you will have to pass a small test. Note that you don't need any extra info like BG or CR.

Now Skrill will ask you 4 questions. The main trick is that, according to my experience, it has no idea

about 2 of 4 answers so you just select "None of the above". If Skrill would really know all these answers he should pay for Background Report for every single person who tried to register an account.

Note that if you make any mistake during this test Skrill won't give you any second chance.

Here is an example set of questions:

1) Which of these roads is close to your adress on 310 Dewey St?

-Power House Rd

-Gentry Walk St

-Chippie St

-WMarion St

-Time Square Ave

-None of the above

We don't know the anwser nor skrill does, so we just select "None of the above"

2. Which of this is your astrological sign?

-Pisces

-Leo

-Aquarius

-Aries

-Scorpio

-None of the above

If you have no clue just Google it (remember we have DoB) and provide the correct answer.

3. Which of the following phone numbers is related to you?

- (708)785-6060

- (432)332-4129

- (307)399-3372

- (609)347-4866

- (330)310-7857

- None of the above

We don't know the answer and supposedly Skrill doesn't, so select "None of the above".

4. In order to finalize your profile verification please select the Social Security Number bellow that belongs to you and provide the last 4 digits as confirmation:

- 565-57-XXXX
- 305-02-XXXX
- 264-31-XXXX
- 232-49-XXXX
- 614-40-XXXX
- 156-70-XXXX

We have valid SSN so just select it. Verification is finished Uploading money with CC

After successful verification go to the ""Cards and bank accounts" and enter CC data. The best thing here is that you can use some one else's card, so its name doesn't have be same as account name we used for verification.

After adding the CC go press "Upload" and upload some money

That's all. I won't tell you what bins are best for Skrill.  
You have to find them yourself. I use cards with VBV.
