In this guide you will be shown how you can generate a paid Netflix account, free of charge, without using virtual credit card or other type of document that can be linked to your person.

Step 1: Get a VPN and a new browser to preserve your identity.

ExpressVPN (trial) - <https://www.expressvpn.com/>

VPNarea (trial) - <https://vpnarea.com/front/>

VyprVPN (trial) - <https://www.goldenfrog.com/vyprvpn>

SurfEasy - <https://play.google.com/store/apps/details?id=com.surfeasy>

VPN Easy - <https://play.google.com/store/apps/details?id=free.vpn.proxy.unblock.android.easy.app>

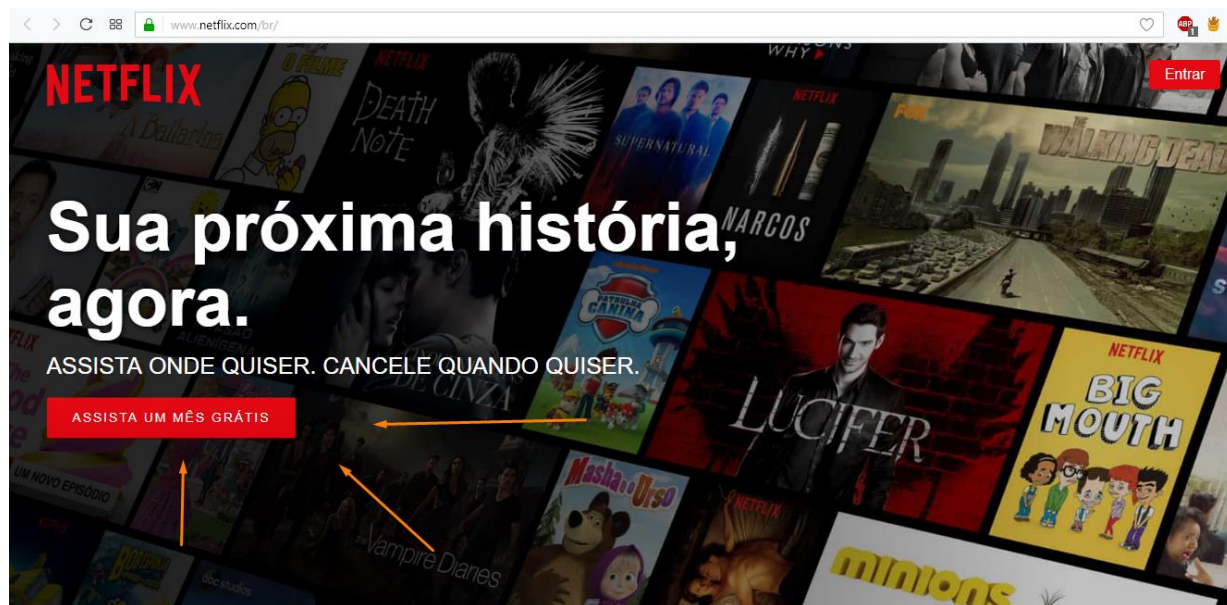

Now download a new web browser (Chrome, Firefox, Opera, Safari, etc..). Dolphin is suggested: <http://dolphin.com/> Open your VPN, turn it on and pick a Brazilian IP.

Step 2: Netflix for Brazil

Visit <https://www.google.com.br/> using the new browser you downloaded which is the Brazilian version of Google. In this way the connection starts from Brazil by a legitimate search on Google.com.br

You must type “Netflix brazil” as it’s the Brazilian site of Netflix.

Once you enter the site you have to sign up for the 1 month trial.

Step 3: Signing up

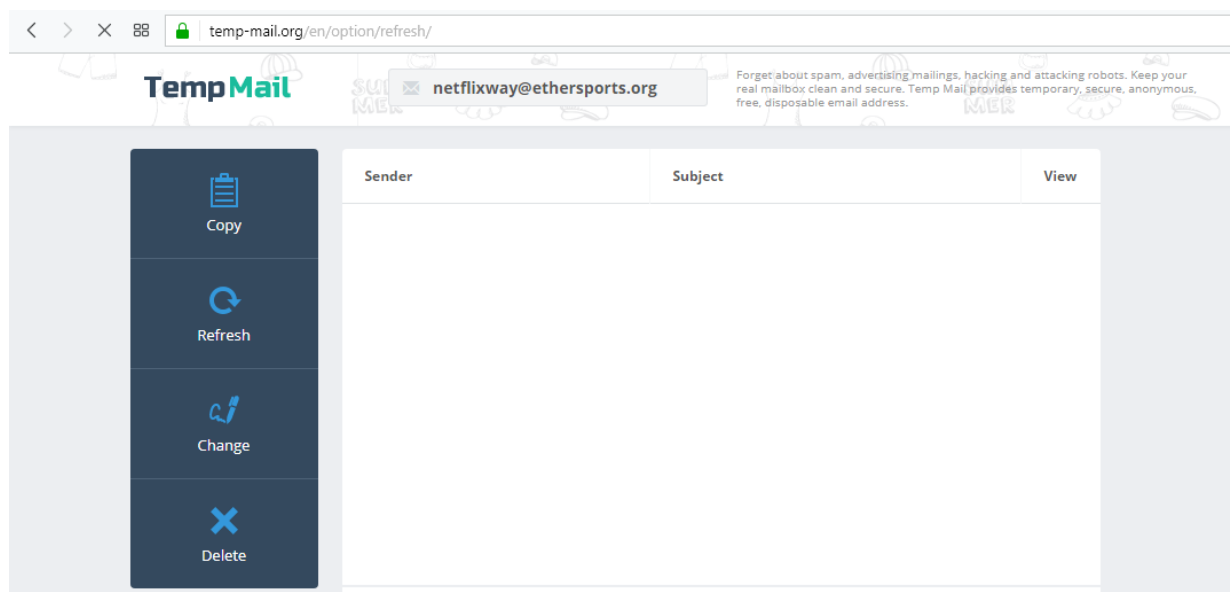

Choose one of the plans that most appeal to you. Since you won't have to pay for it, you can choose even the most expensive one.

This profile allows you to have 4 simultaneous connections with Ultra HD, for a period of one month.

	Básico	Padrão	Premium

A disponibilidade de alta definição (HD) e ultra alta definição (Ultra HD) está sujeita ao serviço de Internet e à funcionalidade do aparelho. Nem todo conteúdo está disponível em HD ou Ultra HD. Para obter mais detalhes, consulte os [Termos de uso](#).

You will need a temporary email to signup. I can recommend using <https://temp-mail.org/> which allows you to generate an email of your choice without registration, as shown in the screenshots.

Choose a password for your Netflix account, now you will be asked for a payment method.

Step 4: Payment method

Pick "Débito em conta" as a payment method. This method can be translated as "direct debit on bank account"

You will set all values including a bank account number, so Netflix will believe you are Brazilian citizen and you have a legitimate bank account.

Informe seus dados de pagamento

Não se preocupe, nós enviaremos um lembrete por email 3 dias antes do fim do seu mês grátis.

You're ready to start. At this point, Netflix will give you its warm welcome to the service. You did it!

This account lasts for 1 month and can be converted into an account of any other language by going to "my profile", then "language" and selecting the one that you prefer.

Here are some profiles we generated during the past 2 days, they will last 1 full month:

Step 5: Important things to be kept in mind

- 1) You only need a VPN with Brazilian IP when creating an account with this method. Once the account has been created you can access it normally, without VPN, from your main browser (delete cookies).
- 2) As soon as you've configured the account, delete the payment method (bank account) to get a full 1 month subscription, this way Netflix won't perform the payment method check. **Do this immediately.**
- 3) One thing that leads most of the accounts to get suspended is having old Netflix cookies in your new browser. Make sure to delete all cookies before creating a new account for Netflix or switching to another one in your browser. **This has to be done every time you change the account you're using.**
- 4) If you followed all passages to obtain a valid bank account and Netflix still returns you with an error, then most likely the VPN you're using has been blocked by Netflix. They're conducting a mass campaign to avoid people using their service outside their origin Country, so try with a new VPN.
- 5) Be smart, don't spread this. We won't take responsibilities if this gets patched.
- 6) Sometimes the VPN being used doesn't let you exit from Brazil but from a close Country. If Netflix URL is the usual netflix.com instead of netflix.com/br then try a different VPN or scroll at the bottom of the page and look for "language" change dropdown. If "Português" is not an option then change VPN ("Spanish" is not a valid option)
