If you Find error Such as western union will verify you via phone call service or via ID Card

Then You're still in luck 3 things needed

1) Complete background of card holder's

- 2) call spoofer and forwarding
- 3) ip phone system / voice changer

#### 1. A complete Background Check of the card holder

This is because if you are going to try and transfer anything over \$100 dollars USD they will ask you various questions such as your previous address, Social security number, Date of birth, Mothers maiden name, what your middle name is, what bank issued you your credit card, etc. In order to get that kind of information you will need to go to a site like [pipl.com](http://pipl.com) and it's free for the information you might need for western union. If you have fullz you'll tell them your fullz detail

First Name : BARBARA  
Middle Name : L. Last  
Name : MILLS Spouse  
Name :  
Father Name :  
Billing Address : 26 MAIN ST.  
City : HINSDALE  
State : MA  
Zip Code : 01235  
Country : US  
Phone Number : 413-685-8195 Credit  
Card Information :  
\*\*\*\*\*  
Card Type : Credit  
Credit Card Number : 4294701930038344  
Exp. Date : 1/January / 2012  
Name On Card : BARBARA L. MILLLS  
Cv2 : 677  
Mother Maiden Name : WALTON  
Social Security Number : 028-42-4621  
Birth Day : 20  
Birth Month : 04  
Birth Year : 1950  
Account Information :

AOL ID :

#### 2. Phone spoofer/voice changer

You will need this because western union will think you are a fraudster if you aren't calling from the card holder's phone number so you must use a phone spoofer service to make the caller id at western union come up with the card holder's phone number. Basically trick western union into thinking you're calling from the card holder's house. The voice changer comes with the phone spoofer service and you need this obviously so your own voice isn't being recorded in case of an investigation and also if you're a male and you're using a female's cc to get money from wu you will want to change your voice to sound like a female.

#### 3. Call forwarding service

This is something you will need because the phone spoofing service blocks 1800 numbers or any toll free phone number. You can only dial 10 digit numbers with phone spoofers so you have to get a call forwarding service so when you call the 10 digit number from the call forwarding service it will forward to western union. I will provide you here some link free

#### 4. Internet phone service

If you are located in europe this is a must because it will cost you too much to use the spoofer and call forwarding service and it is also not traceable.

I am providing some Link's here
