

[NO-FAIL CARDING TECHNIQUES]

By

- Ford Prefect -

INTRODUCTION

This text file is designed to help the frustated beginning Carder, even though it can also help some experienced Carders. I am fairly new to Carding and this is my first text file. Therefore, this might be old news to some of you veterans. I haven't seen a text file about this technique, so I hope it helps anyone out there who has not discovered the fail-safe way to card.

FRUSTRATED?

I sure was. I have only been carding actively for about 9 months. I have tried at least a dozen times and only been succesful once. I used mail-order, drop-houses, vmb's, etc. This required lots of patience. I was very frustrated until I thought of my parents' credit cards that I used frequently. I thought that if I could get ahold of anyone else's REAL credit card, I will be stoked beyond belief!

OBTAINING A CARD

So, the object is to use a REAL cc. How do you get one you ask?

- 1) Make or obtain a flyer. Make about 100 photocopies. Wear sunglasses (only on a bright day) and a baseball cap and normal clothes. Bring a backpack. Drive to a middle-class neighborhood far from your house and park your car outside of the track. Enter the track then look for cops and the sorts then proceed to a mailbox. Pretend you're passing out flyers (putting flyers in mailboxes is breaking a federal law, but the majority of the population is unaware of this fact.) This is what you will be looking for:

- A) Enveloped with banks as return addresses.
- B) Free Sample Coupons
- C) Green and red envelopes during the Holidays. (Grandparents' Christmas gift to their kids - money)
- D) Playboy magazines.

Put these in your backpack, but make sure no one is looking. After hitting a mailbox, skip the rest on the street. Go to another a couple blocks away.

Ok. You've got the envelopes. Very seldomly do you find brand new cards here. If you do, you have to send back the form that

states that you have received it. After that, wait 1-2 weeks and you're set to go. But most of the time, you will find bills (EXCELLENT for mail-order) or qualification notices. With the notices, (most do not require social security) fill them out and send them. Wait a day or two and then frequently check the same mailbox for the card.

- 2) Ok, at weddings at parties, most people leave purses in a pile or in a closet. When everyone is drunk, search them for the cards. Most likely, they won't know it's missing until the next day or the following.

USING THE CARD

Great! You've got the card. Next thing to do is to obtain a fake state id as the cardholder or someone with the same last name. This will run from \$5-\$10. If you've got the cash, get a fake high-quality driver's license for about \$40.

Now, you've got one factor against you. Time. When you use the card, don't go outrageous and card like 5 Sony Discmen. Keep it reasonable and unsuspicious. When you first enter the store, ABSOLUTELY make sure that there are no cameras or electronic surveillance. And that it is not too busy, you can get away, etc. Use common sense. Card away! One thing will inevitably happen. The card will show up as stolen. Observe the salesperson. If you see anything weird, run!

CONCLUSION

Well, this technique can be very profitable. It takes a lot of effort, but is worth it. Instead of waiting on UPS for something that might not even show up, you get it right there and then. There are also a lot of risks involved. One last tip, make up a good excuse for your parents and more importantly, DO NOT TELL ANYONE of your profits.
